

Compass

Unleash the Power of your Data

Whether it's an API, a spreadsheet, or a database, connect to your cloud or on-premises data and easily customize your visualizations.

What is Compass?

Our **Compass offering** combines two of Truenorth's flagship services; Visualization Engine and Business Analytics. Serving all industries, it can be fully customized using Microsoft's proven software; Azure, Power BI, and SQL Server.

Why customers use Compass?

- Manage complex data
- Quickly build powerful visualizations
- Easy-to-read insights
- Designed for a mobile-first world

Manage Complex Data

- Leave spreadsheets behind
- Connect to multiple data sources
- Configure on cloud or on-premise

Multiple data sources from a variety of departments / entities.

Communicate Critical Information

- Data consistency across the organization or multiple entities
- Easy-to-read insights for fast-paced decision making environments
- Peer collaboration in a cloud based data portal

Used as a primary communication tool during disaster recovery efforts.

Mobile-First World

- Native HTML 5 with responsive design patterns
- On-the-go information, always available
- Easy-to-follow modern layout

24/7 C-Level Executive and operational dashboards.

"We thank the Government team, **Truenorth**, and **Microsoft** for allowing us to use their technologies to develop this tool to effectively communicate what the Government is doing during the emergency (Hurricane María)."

- Ramón Rosario, Government of Puerto Rico's Public Policy Secretary
