

Complete Digital School Solution

Providing an end-to-end platform for all school operational requirements under a unified umbrella with a seamless experience covering multiple curricula

Phoenix RISE is an integrated all-in-one school management system bringing together educational and operational elements under a single umbrella

All-in-One Integrated Platform
Brings together educational & operational requirements under a single umbrella

AI Enabled Analytics
AI integrated platform for enhanced teaching & learning propositions

Ready to integrate APIs
Microservices enabled APIs to popular CRM, ERP, LMS, timetable & other applications

Simplified migration capabilities & tools
Simplified migration capabilities & tools with customized options to enable smooth transition

Curriculum agnostic
Caters to multiple curricula such as US, IB, American, National etc.

Regional customizations
Aligned to local Regulatory mandates like Educational ministry, taxation, health & safety guidelines

Classroom is an advanced learning management system where students, parents and teachers come together and collaborate

Blended Learning capabilities
Provides blended learning capabilities for enhanced teaching & learning propositions

Synchronous / asynchronous lessons
Provides both synchronous and asynchronous lesson delivery

Multi-lingual support
Supports regional language(s) in addition to English

Comprehensive Parent View
Comprehensive parent view to keep track of their child(ren)'s learning needs & progress

Built in analytical capabilities
Ability to track and monitor student progress based on key data points

Omnichannel experience
Multiple user touch points over web and mobile that connect seamlessly

HSE is a custom-built health and safety and child safeguarding solution with configurable workflows managing complete incident, audit and task management

Custom built Solution
Tailor made solution to address HSE and child safeguarding

Child Safety
Record and track incidents for safeguarding the welfare of all children

Policy Management
Automated workflows on accessing, acknowledging and signing key internal policies

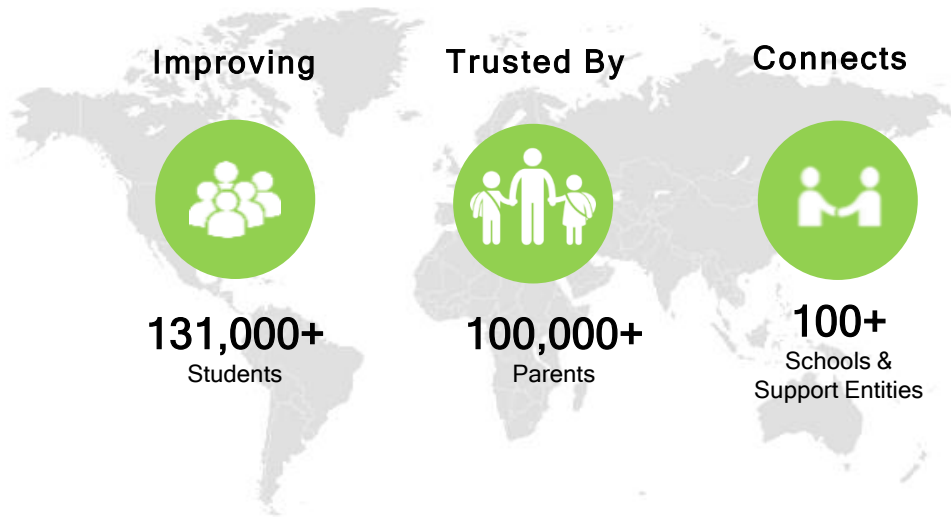

Incident Management
Report, manage and analyze risk events across schools

Data Collection
Connect, record, monitor, calculate, analyze and report on key data metrics

Audit Capabilities
Easing the administrative burden of audit and inspection process through automation

“Since we moved to Phoenix, our previous issues with multiple systems and logins have all dropped away”

Lachlan MacKinnon

School Principal, Cambridge International School Dubai

Future is Blended

Based on our extensive research, we believe the future of K12 is “Blended”. Blended learning will become a permanent part of the education landscape and their prominence will continue to grow. Brick & Mortar schools that utilize exponential technologies to implement the right blended learning models will thrive in the new normal. Physical school-time could be more productively utilized for collaboration, concept de-briefs, in-person activities such as science labs, physical education etc. while adaptive learning methods can be used for self-paced learning.

Educator like no other...

We are the most well-regarded choice for quality private education in the Middle East and North Africa region. With proven expertise in providing quality education across multiple curricula and successfully running brick & mortar schools, we are uniquely positioned in managing school operations. Furthermore, over the years we have built an innovative IP suite of technology products and solutions for enhanced teaching & learning outcomes

EdTech Play

With sixty years of providing quality education for millions of children across the globe and proven success in using Technology to improve learning and teaching outcomes, we are in an advantageous position to lead this transformation towards a blended model supported by state-of-the-art EdTech. While there are multiple technology companies trying to come up with education solutions, we are the only educators of any significant size and scale to have built EdTech products & solutions.
