ePlanning.io
GOVERNMENT INTEGRATION PLATFORM

ePlanning.io: Transforming Planning Portal Integration for Local Councils

Who We Are

ePlanning.io is the local government integration & development team from Sentient Dynamics.

- We're an Australian wholly owned and operated Microsoft specialist Business Applications & Azure Partner based in Sydney, Melbourne, Brisbane, Adelaide & Tamworth

- We partner with local governments, state government and federal government organisation to help them with their technology & business transformation

- We develop cloud solutions, applications, integrations, and business intelligence solutions

- We created ePlanning.io to reduce wasted effort associated with manually handling planning & development applications

Revolutionising Planning: ePlanning.io Product Overview

ePlanning.io is a powerful Local Government integration platform designed to help local councils and private certifiers connect their existing IT systems to the State Government Planning Portal. Built on Microsoft Azure, Dynamics 365, and the Power Platform, our solution automates data transfer, eliminates manual processes, and reduces errors associated with double-handling.

Developed by Sentient Dynamics, a Microsoft Business Applications & Azure Partner, ePlanning.io is backed by years of experience in partnering with SMB, Corporate, and NSW government clients. Our agile, iterative delivery methodology and extensive expertise in business applications, workflows, interactive reporting, and integrations ensure a robust and reliable solution for your council's planning application needs.

API Inclusions

ePlanning.io provides end to end integration for all NSW Planning Portal APIs - e.g. Create DA > lodgment

We have developed custom document and records management connectors that handle conversion to PDF and de-duplication

Our connectors can be added to Microsoft Power Automate to extend your planning processes and workflows

API	ePlanning.io API

Power Automate Connectors	

Empowering Integration: ePlanning.io Key Features

- Seamless integration with popular Council ERP systems, including TechnologyOne, Ci, CiA, Civica Authority 7, Infor Pathway, and Dynamics 365

- Custom connectors for designing workflows using Microsoft Power Automate Flow Builder

- Multi-region Azure failover for maximum uptime and reliability

- Custom reporting capabilities with Power BI integration

- Continuous updates to match Planning Portal and ERP vendor API changes

- Supports TechOne Compliance Connector (Ci, CiA, Content Manager 9/10, and Objective DMS (coming Q2 2023)
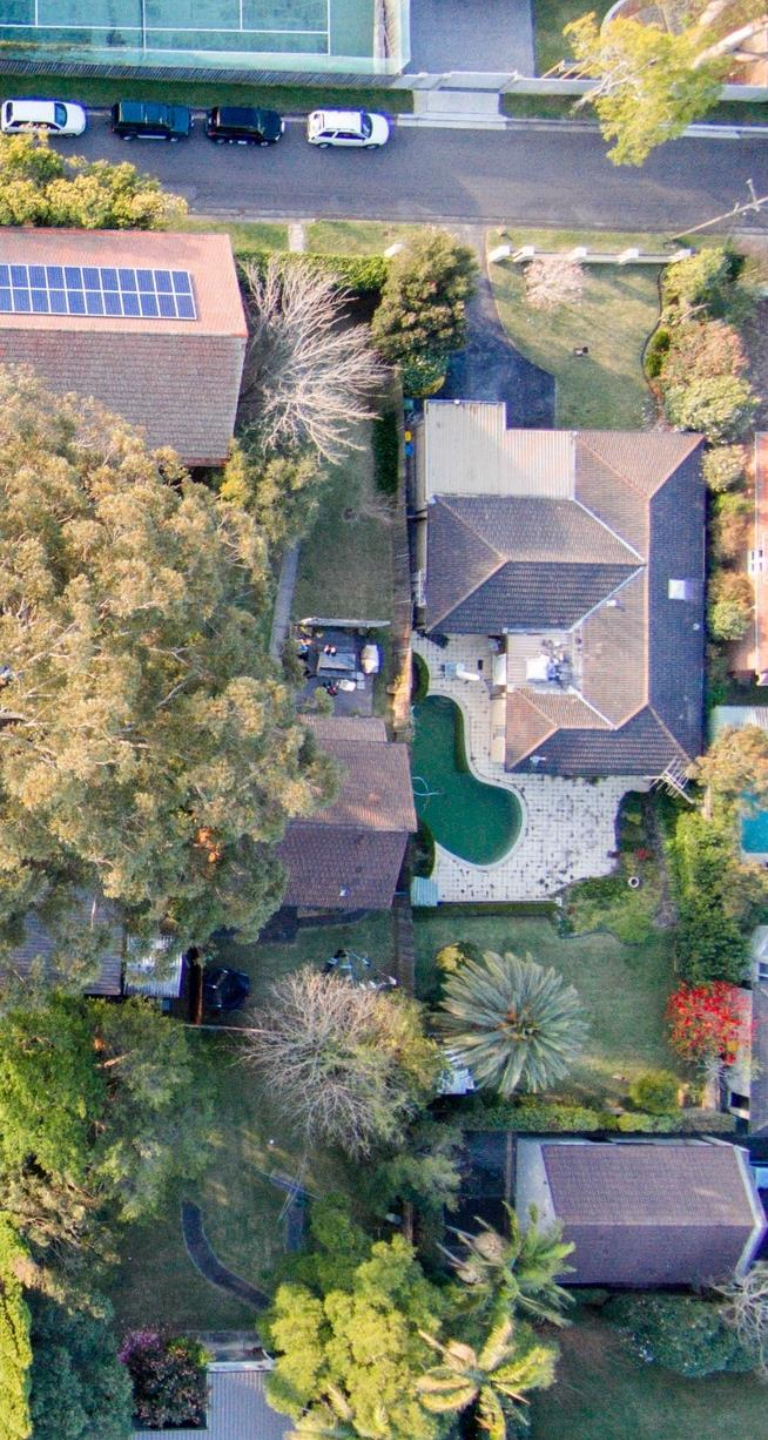

Unlocking Value: Key Benefits of ePlanning.io

Efficiency

Save time and resources by automating data transfer between council systems and the Planning Portal, minimising manual intervention

Accuracy

Reduce human errors and overheads associated with manual data handling, ensuring a more accurate and efficient planning application process

Up-to-date

Stay up-to-date with the latest API changes without employing a team of developers, thanks to our continuous updates and support

Customisation

Leverage the power of Microsoft 365 and Power Platform for custom workflows and processes
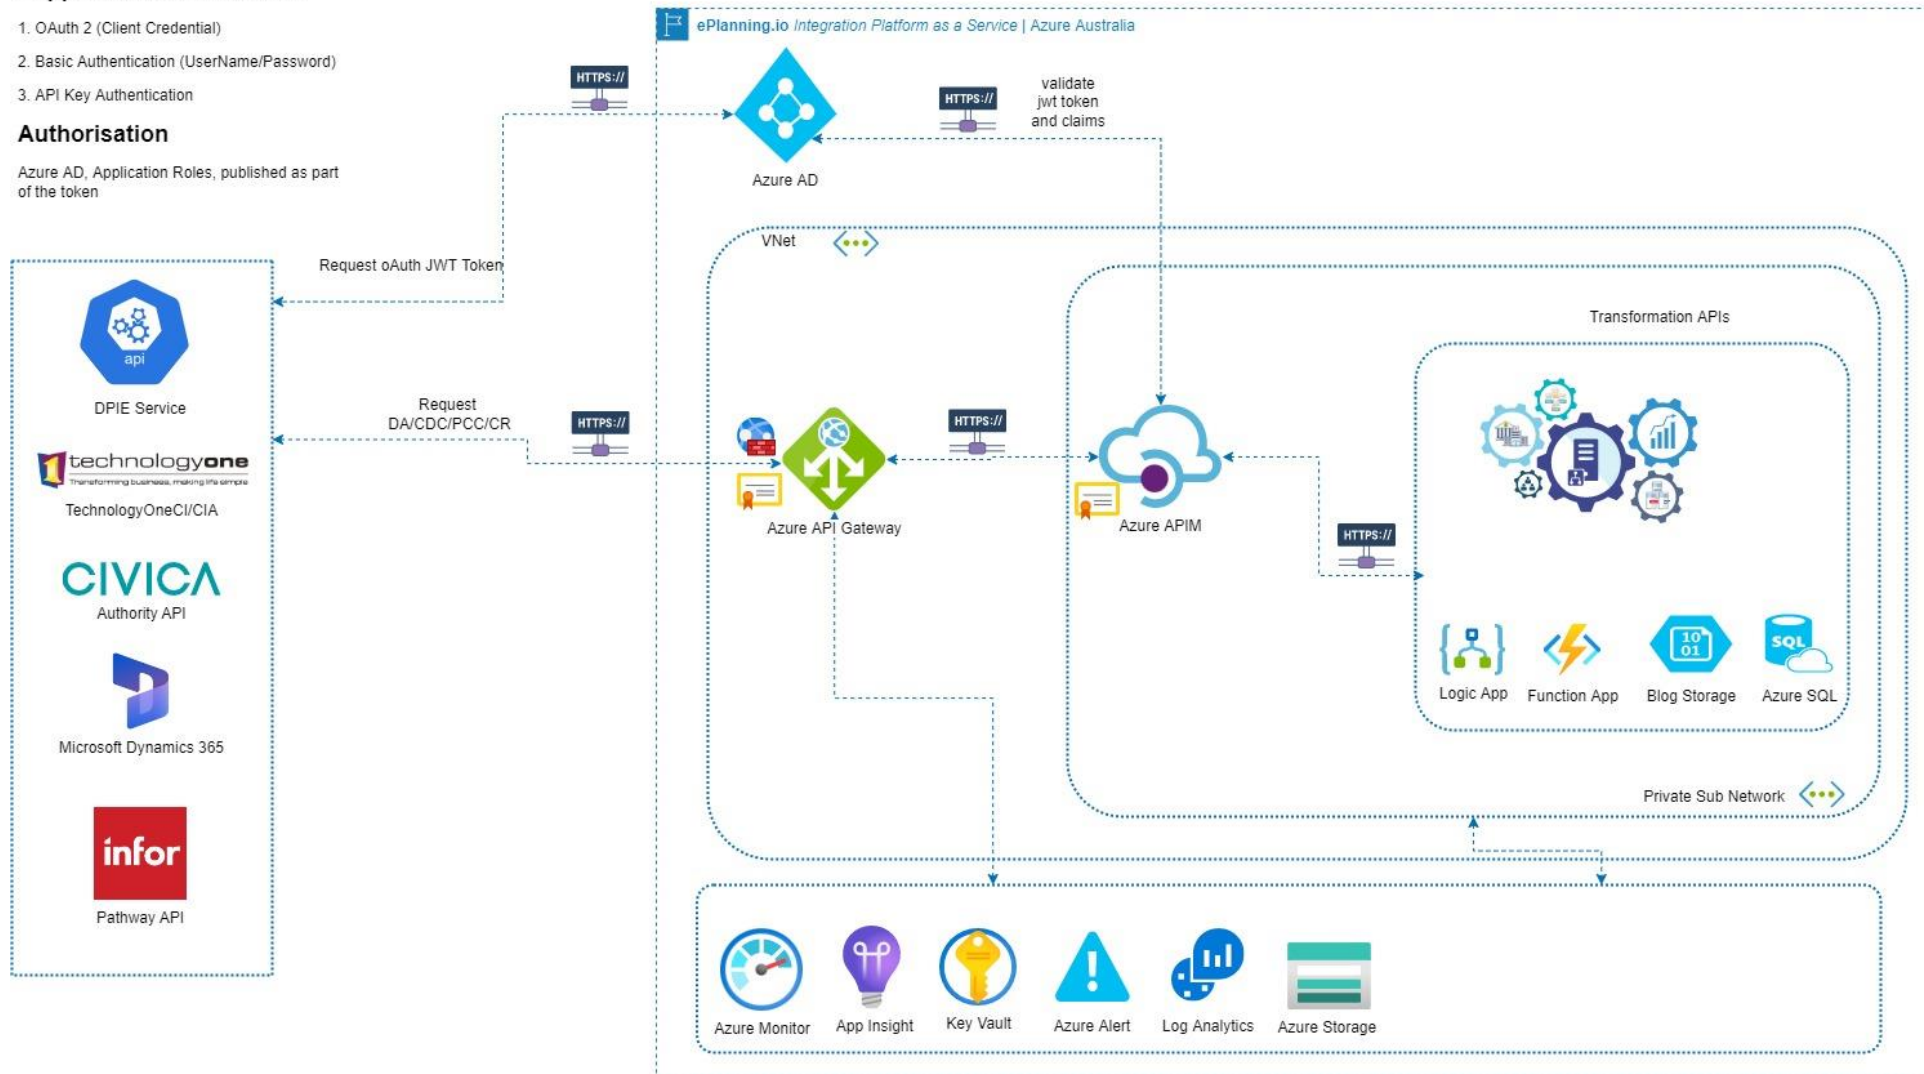

Architecture

Our solution is developed entirely on Microsoft Azure in the Australia East region, leveraging an event-driven architecture backed by the Microsoft Cloud Adoption Framework.

Integration Add-Ons

Take your planning processes further by leveraging ePlanning.io to integrate planning workflows into Microsoft 365, Azure and Power Platform, including Power BI Reporting.

Microsoft 365

Power Platform

Dynamics 365
