

# All-in-One School Information System

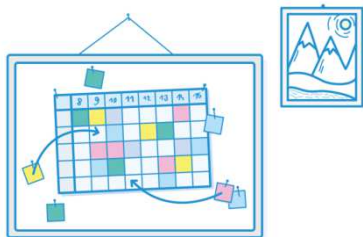

Engage parents, manage school and provide distance learning in your daily education.

**Online Gradebook, Parent Portal, SIS, LMS, Scheduling and Communication Tools in One System. Edookit support educational process with modern tools. You can provide full distance learning including video lessons with Microsoft Teams®.**

## What is Edookit?

Cloud based school information system developed together with teachers and parents. School pay a monthly fee and provide teachers, students and parents with the free access to their Edookit.

## Easy scheduling and teacher's substitution

- **Organise your lessons, teachers and students**
- Graphical UI with drag&drop
- 3-clicks substitution of teacher

## Mobile App for Android and iOS

## School's administration simplified

- **Powerful tools**
- Parent's payments uploaded with bank account statement
- Schools library

## Replacement of paper communication

## Why customers use Edookit ?

Edookit simplify teacher's daily administration with following:

- Easy-to-use with fast response
- Support of LMS and distance learning on one place
- Replace paper communication with new secured electronic documents
- Secure system available anywhere

## Engage parents and students

- **Information right on time**
- Enter data once, display many times
- Education progress report

## New gamification features this autumn.

In the spring of 2014 we have come to a clear conclusion - to fully implement Edookit. We are more than satisfied since then - in the two years of usage we never had a situation we couldn't solve thanks to the system. A school without all the paperwork related to gradebooks, class registers, supply teaching lists and all the other documents simply functions much better.
