

Shohoz Truck

Cloud-Powered one stop Logistics Solution for all your TRUCK needs.

Shohoz Truck is a SaaS platform , which is a part of Shohoz, a technology enabled logistics company that aims to deliver and provide transparency and par excellence to our clients.

As a service, Shohoz Truck is a multi-tenanted platform that enables all sorts of TRUCK needs for B2C & B2B marketplace. The platform can make it easier for shippers, transporters and brokers across the world to connect with a network of verified truck owners and fleet operators.

Truck business as whole is quite primitive in around the world , but using technology to solve the volatility of a market that changes every minute, is something revolutionary. Introduction of the digital medium to facilitate, manage and request Trucks for all sorts of logistical needs, have shifted the market in a new direction. Shohoz Truck as a service-oriented platform aims to solve some of the basic problems and they are-

- Market-place Rate Stabilization
- Verified Fleet-Operators
- Constant Truck Availability
- Risk mitigation for both party
- Earning & Cost Guarantee

As the business grows, our Technology team is hard at work, scaling up the service complementing the business team to reach their goals without having to worry about all the challenges of an infrastructure. This was possible due to AZURE Cloud based hosting solution which Microsoft has graciously helped us transition over.

Powered by Azure Cloud Services and Azure Machine Learning, here are some key benefits Shohoz Truck as a platform is delivering:

- Single Sign-on capability helping multiple actors, such as Merchants, Vendors, Fleet operators, Users & Operations personnel -logging into our service with different capabilities.
- Easy to manage for the System Admins due to easy management & interactive UI. DevOps do not require extensive technical knowledge, this helped us find resources and train them quickly so the system can keep pace with the business
- Built-in virtualization technology enables us to manage different environments, where we get to sand-box all sorts of scenarios, in real-time helping us to understand our capabilities better

- Azure based IaaS platform benefited our service to build, deploy, and manage the apps in a quick and easier way, as we have present in different platforms

For managing Shohoz Truck service, based on our Operational & business entities, there are internal Panels which enables us to have good control over the whole platform. These are the panels that help operation teams to manage the service -

- Admin Panel
- Customer Care Panel
- Operations Panel
- Sales Panel
- Acquisition Panel
- Brand Promoter's Panel
- Corporate Sales Panel
- Accounts Panel
- Verification Panel
- Human Resource Panel
