# 1. What is BrakeArtus?

BrakeArtus is a Brake Lit Lights Detection API using an input photo powered by Artificial Intelligence and powerful cloud infrastructure.

## Target Audience

This API is meant for IT developers which are making apps to recognize brake lit lights in a photo taken by a camera. Domains of using it: surveillance cameras for traffic, parking, roads, automotive etc.

# 2. Which Are The Benefits?

## **Automated Process**

All processes are automated. You just have to follow the required rules for getting a high accuracy reading.

## **Easy to Integrate in your APPS**

We have multiple sample source codes presented on our website written in different programming languages which will help any developer to easy integrate the API in the APP(s).

## **Chat Support 24 x 7**

If you have questions or need some help, we are glad to quick answer you and offer the best we got.

## **You Own Commercial Copyright**

Yes, you may call our API in your APPs and feel free to sell your applications without any extra fee than our pricing packages.
