

infsoft Automation Engine

infsoft Automation Engine

infsoft Automation Engine is an HTML5-based service, that enables (geo-based) definition of action items along the process chain in real time. Data source can be any sensor technology (such as Wi-Fi, BLE, UWB, RFID, LoRa and GPS) or third-party device management consoles connected to the infsoft LocAware platform®.

infsoft Automation Engine | Purpose:

- Definition of alerts and triggers
- Automated actions based on triggers
- Management of recurring tasks

infsoft Automation Engine | Features:

- Event triggers based on changes of device attributes (e.g. entering an area)
- Definition of recurring tasks
- Push notifications, emails and call of third-party web services
- Visualization of events in list format and map display including push, emails, ...
- Logging of all actions including affected devices
- Console output for all actions
- Scripting Engine with full access to all infsoft class libraries
- Fully extensible JavaScript engine
- Support of custom libraries and web services (JSON/REST, SOAP/XML, ...)

insoft Automation Engine | Related services:

insoft Automation Engine can exchange information bidirectionally with the following insoft services:

- insoft Analytics
- insoft Tracking
- insoft Sensors
- insoft Workflow Management
- insoft Machine Learning

insoft Automation Engine | Requirements:

The HTML5 service does not require an installation on the user's PC and is compatible with the following browser versions:

- Chrome (Version 47.0.2526 or newer)
- Firefox (Version 34.0 or newer)
- Safari (Version 7.0 or newer)
