

ContrOCC (Children)

Providing powerful finance functionality for all areas of children's social care

By working in partnership with Liquidlogic, ContrOCC enables local authorities to benefit from a single, fully integrated case management and finance system for all aspects of children's social care.

'ContrOCC has vastly simplified our payments administration and empowered CWaC to take control of our payments processing.'

Features and benefits

Unified system

OCC and Liquidlogic have a long-term strategic partnership, which has brought significant benefits and savings to the councils using our systems. The integration between ContrOCC and LCS is rich, sophisticated and reliable.

Paperless processing

ContrOCC enables wholly electronic, online management of scheduled payments, invoices and expense claims. The system interfaces with corporate finance to enable seamless processing of payments.

Provider Portal

The optional Provider Portal enables providers and carers to communicate efficiently and securely with the council. The Portal generates email notifications automatically whenever input from the provider is required.

Accurate budgeting

Budget codes are assigned automatically by ContrOCC. This eliminates the risk of miscoding and inaccurate forecasting and removes the need for manual entry of budget codes.
