janison insights

Transform how you deliver tests and assessments

Trusted by educators and governments around the world, the Janison Insights digital assessment platform brings together the industry's best cloud technology with a powerful suite of end-to-end tools to let you author, deliver, mark and analyse assessments for hundreds to millions of test-takers.

Powering online assessments for governments and educators in more than 100 countries

❯ Eliminating geographical and connectivity limitations with technology that runs uninterrupted, regardless of internet drop-outs.

❯ Delivering efficient authoring and marking, and swift delivery of results.

❯ Providing a consistent, authentic assessment experience for every candidate.

❯ Offering analytics that close the divide between teaching and outcomes.

The groundswell of digital transformation within testing and assessment is undeniable

Measuring students' or citizens' knowledge and skills is an essential part of any education or certification process. And, as almost every aspect of day-to-day tasks becomes digitised, paper-and-pen exams and assessments are fast becoming an outdated, resource-hungry and inflexible way to evaluate knowledge and tailor teaching.

But it's not enough to simply digitise. For almost all candidates sitting any test or assessment, the results have life-changing consequences – such as access to the most effective possible pathway through schooling, or to higher education, post-graduation, their choice of career, a driver's licence or qualification for citizenship.

That's why the technology you offer your test-takers must be sturdy and seamless, and offer them an equitable, reliable experience every time – as well as swiftly informing them of their results. It's also why any assessment technology must equip educators and certification bodies with the tools to deliver testing as effectively and efficiently as possible, freeing their valuable time to focus on quality teaching.

We've created and are constantly enhancing Janison Insights and its award-winning test player application, Janison Replay, as well as the ability to offer candidates tests remotely, so that you can be sure of this and more.

Over the past decade, Janison has earned a solid track record in delivering national-scale, dependable, efficient technology solutions for educators and governments around the world. Take your testing to the next level with technology that centralises and streamlines your entire assessment process, wherever and however you need to deliver it.

Eliminate the limits of connectivity and geography

Our award-winning delivery application Janison Replay ensures that your online tests keep running even amid internet dropouts.

Results and data in turnaround times that are incomparable to pen-and-paper

Welcome Peter!

This is your marking dashboard. Here you will find summary information about marking tasks for you and your team, access to perform your assigned tasks, and helpful information about how the systems works.

MARKING PROJECT
Main marking project

STEP 1	STEP 2	STEP 3	DOMAIN SUMMARY
Improve your marking skills	**Mark student responses**	**Resolve conflicts**	Reading
Accurately marking responses to the Tests is essential to ensure the accuracy of our final reports.	View questions assigned to you to mark, and a summary of the questions you have marked so far.	As a senior marker, you are able to resolve double-marked responses that do not match.	71595 29496
	Assigned responses to mark: 0	**Conflicts: 4567**	Science
			62844 38070
			Maths
			32369 358(
[Training materials]	[Mark responses]	[Resolve marking]	■ Marked ■ To be resolved To be marked
Project summary	MARKED RESPONSES **166808 / 241836** 69%	AVG MARKING SPEED **18534** responses per day	EST TO COMPLETE **~4** days

The marker dashboard lets you streamline workflows and quality control, and displays your team's overall progress.

Marking

Tools that make light work of quality-assured marking

- Features to easily form and manage your marking teams
- A range of marking modes to suit your needs – automatic, semi-automatic and manual marking
- Real-time quality checks on your markers, including standardisation and blind-quality monitoring
- A full audit trail of all human touchpoints, ensuring traceability and security

Analysis

Reporting at the push of a button

- Set reports to run automatically on a defined schedule.
- Create professional reports that tie multiple data sources together, using pre-saved custom settings and sophisticated filters.

Gain deep insights into your candidates' performance

- Deliver results in turnaround times that are incomparable to pen-and-paper
- Receive live updates on delivery statistics
- Customise and generate professional reports with minimal input.

" We have much better visibility of post-exam processes now. Less work for marking staff, zero handling and counting of papers, and less prone to error on transfer of marks. – **University client**

Efficient, equitable testing, no matter your industry

Scalable as well as smooth and economical to implement with your existing infrastructure, Janison Insights powers testing and assessment across a breadth of contexts. Whatever your industry or department's specific needs, our platform provides the solutions.

Higher Education

Deliver exciting and rich assessment experiences to a digital generation of students and an efficient, streamlined workflow for your staff. Create exams in as little as 30 minutes; mark and deliver results within 24 hours. Deep data insights and analysis tools allow you to make informed education strategy decisions.

Schools K-12

Overcome large-scale delivery challenges in the most politically and emotionally sensitive of assessment scenarios. Drive education excellence by pinpointing where students need the most help, and streamline cumbersome administrative processes for teachers and examiners.

Certifications and Professional Associations

Turn around swift, standardised results – in many cases instantly. Janison Insights lets you offer a wider variety of tests within project management, such as Prince2 and PMP, Scrum master, as well as certifications in accountancy, HR, finance, IT, teaching and more.

Language Testing

Be sure of a swift, reliable and equitable test experience, no matter where in the world candidates sit their test. Assess writing, reading, speaking and listening remotely, without the need for an examiner in the room, and release quality-assured results within hours.

Government

Create efficiencies that offer an outstanding experience to members of the public who interact with your federal or state government department. Deliver digital testing related to driver licences, citizenship, migration skills-assessment, ICT literacy, pre-employment, credentialing, mandatory industry testing and more.

The assessment transformations powered by Janison Insights

BRITISH COUNCIL

British Council takes its English language testing beyond borders

The unshakable remote technology in our test player Janison Replay allows the British Council to deliver its internationally-recognised English language proficiency exam, Aptis, to candidates in some of the most remote and technically challenging parts of the world.

When the outcome of an exam can open life-changing opportunities for the candidate, a stable and fair testing experience is vital. Janison Insights solves a critical challenge for British Council: delivering speaking, reading and writing tests in more than 100 countries efficiently and securely.

Each year, the platform ensures that their 300,000+ candidates all receive a consistent test experience, no matter their location and internet quality.

NSW GOVERNMENT | **Education**

An online literacy and numeracy exam that helps NSW Department of Education pave the way to success for Year 7 students

The Best Start Year 7 exam, the first of which was delivered to more than 40,000 students, is becoming a case study for government education departments across Australia. Using tools that are unique to online assessment, it quickly identifies students at risk of falling behind at a crucial juncture in their schooling – and pinpoints what teaching support they need by providing intricate diagnostic data to inform teaching intervention.

The technology supports several thousand test completions per day, but despite its sophistication, is user friendly to cater to all levels of technical literacy among teaching staff. It was built to operate reliably amid varying IT infrastructure at the hundreds of schools taking part across the state.

"

Janison has worked collaboratively with the Best Start Year 7 team. Teachers administering the test found the system easy to use and the online format successfully engaged students to demonstrate their skills and understanding.
