

Passport 360

Cloud On-Boarding...
The Smartest Way to Manage
Contractor Compliance

HOW DOES THE CURRENT ON-BOARDING PROCESS AFFECT YOU?

CORPORATE CLIENT

Inefficiencies and significant:

- Standing time costs
- Lost production day costs
- Frustration with engaging your Contracting Community

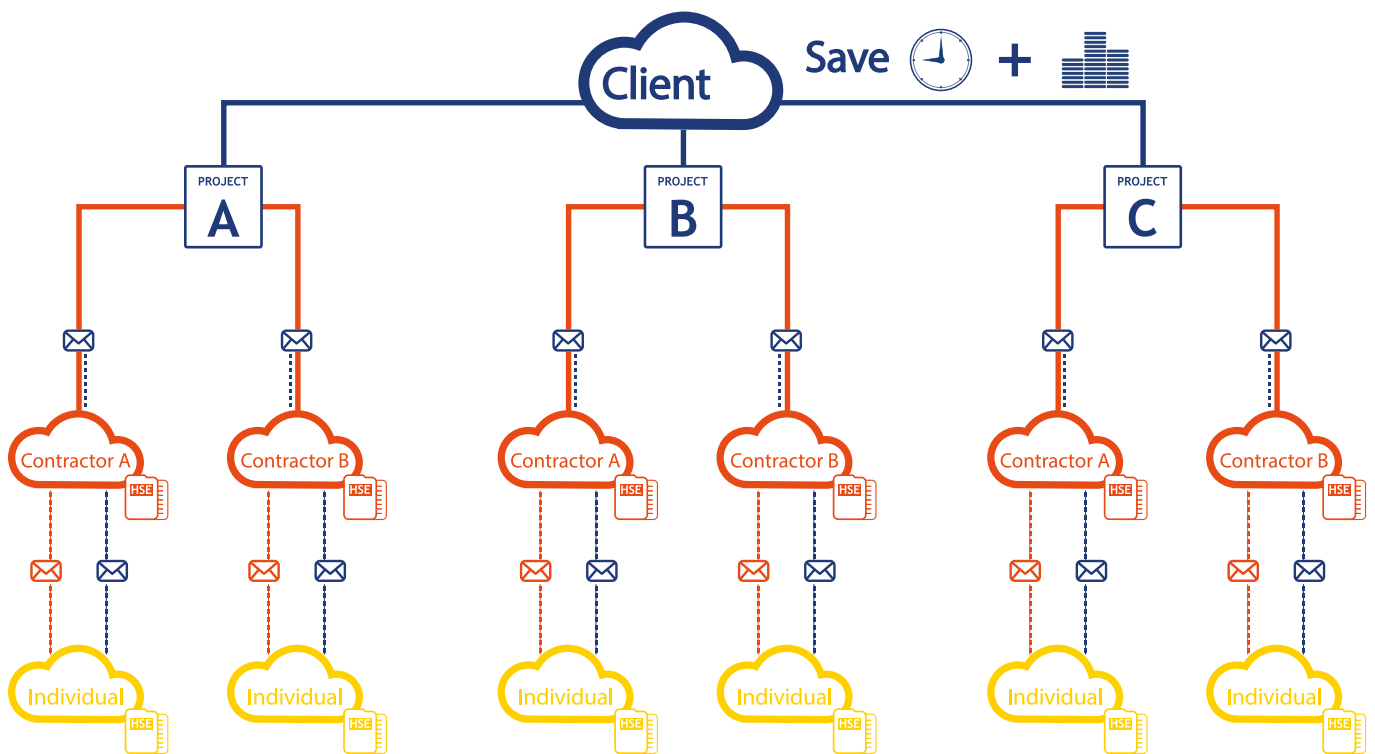

SERVICE PROVIDERS AND INDIVIDUALS

- Duplication of training
- No centralised medical records
- Lack of HSE records
- Gap in communication from your Employer
- Excessive travelling costs & time wastage

INNOVATIVE CLOUD SOLUTION AVAILABLE ANYWHERE ANYTIME

Passport 360 is an innovative web-based system providing an efficient solution to *Contractor Management*. The Passport monitors and records vital information for Legal Compliance.

The *Individual Smart Record* stores safety training history, medical fitness certificates and competencies per position of workers in the mining and construction sectors, as well as various other industries. This information is available to you at the click of a button, anywhere in real time

BENEFITS

- Improved compliance management
- Improved performance management
- Communication to individual service providers as well as service provider community
- Advanced and in-depth customised reports allowing focus on problem areas
- Centralization of information
- Tracking and monitoring in real-time
- System alerts via SMS, Push, Social Media and Email
- Analyze trends
- Time and cost reduction
- Holistic approach improves visibility

Passport 360 boasts a user-friendly Interface with focus on Contractor Management.

With support on all devices, **Passport 360** is just an online connection away.

Available at your fingertips, anywhere and anytime.

Passport 360 takes away the hassle of IT support having to maintain software systems, servers, networks and backup. The load is lightened by being hosted in the cloud.

All vehicles and large equipment can be loaded and tracked ensuring important safety elements are monitored.

Maintenance history, renewal tests, linked drivers and training modules are captured.

Tools can also be linked allowing for the tool register to be easily created per project.
