Intelligent Process Automation

Dost Digital Brain

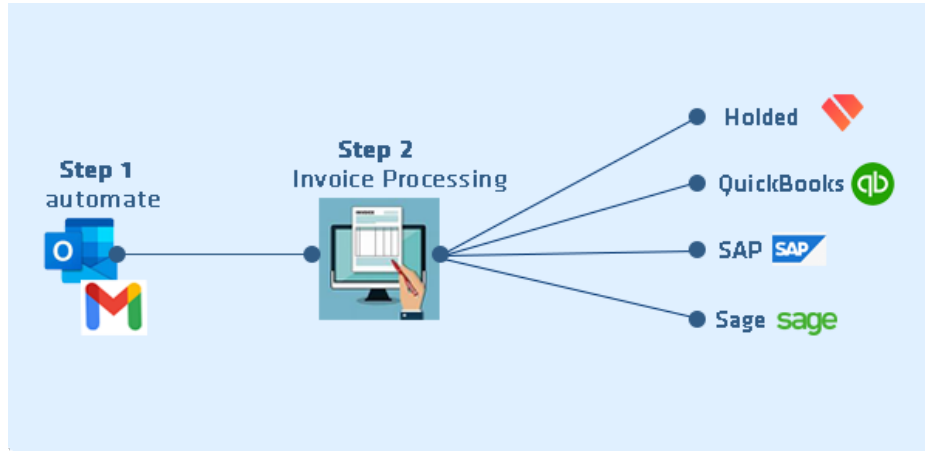

Companies have the big problem of spending a lot of time on repetitive and worthless tasks where humans must use intelligence to solve them.

At DOST we help the intelligent automation of processes in our client using a digital brain.

*The Dost Digital Brain (DDB) has the ability to **read, think, intuit and act like a human** and is also capable of interacting with the company's main management tools.*

What is DOST for Invoices?

DOST for Invoices is a software-as-a-service (SaaS) solution to automate the process of receiving, processing and posting vendor invoices using artificial intelligence (AI) and intelligent process automation (IPA).

What is the challenge?

Human error
during data
entry

Loss of time and
delays

Repetitive and
worthless tasks

Inefficiencies in
processing vendor invoices

Loss of
money

Why hasn't it been automated yet?

Because traditional solutions are used or even everything is done manually:

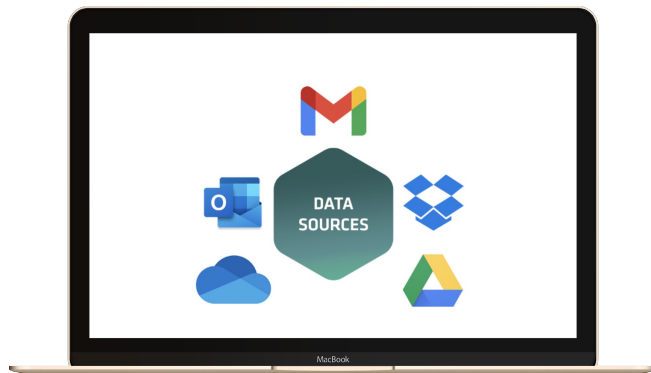

- *Traditional solutions, such as OCR, **do not have artificial intelligence**. They require a previous parameterization that can take up to 9 months.*
- *If invoices are processed manually, each invoice costs **approx. 11€-16€***.*

* McKinsey, Gartner

How can DOST for Invoices help me?

In just 3 simple steps DOST processes, posts and transfers the information to the right application:

- 1. Dost connects to mail, cloud storage or document repository looking for invoices.*
- 2. Dost reads the information from your invoices, extracting all the information from them, makes sense of the data and prepares it for action.*
- 3. Dost prepares the information to be perfectly included in the ERP and sends it through its API.*

What is not DOST for Invoices?

DOST for Invoices is not an OCR (Optical Character Recognition) tool:

- DOST does not work with predefined or customizable templates.*
- When DOST is confronted with a bill, it is important that it is the first time that you see this format, or that it is a known format with an irregular number of lines.*
- DOST reads all the information and will be provided with what is required for its system.*

The main advantage with respect to an OCR is that all the information will be captured, analyzed and interpreted as a person would do, reducing the error to 1%.

Why DOST for Invoices?

Customer benefits

Saves time and money

Dost helps you reduce the time and cost of processing vendor invoices.

Eliminates human error and inefficiencies

Dost minimizes human error when entering data into your ERP and all manual, repetitive and inefficient tasks.

Innovation and productivity

More resources and budget available to invest in innovation and be competitive in the marketplace

Technological benefits

AI and IPA in the heart of Dost

- Traditional OCRs are not intelligent and need to be configured and maintained.
- We use AI/ML and IPA to extract invoice data, process it and automate the process.

SaaS, Secure and without installation

Dost is a software-as-a-service that requires no installation or maintenance and is hosted in the cloud and complies with the most stringent security measures.

Key features of DDB

DOST DIGITAL BRAIN:

- *Multilingual.*
- *Trained in the process. You don't have to start from zero teaching the engine.*
- *Out of the box solution in SaaS. No requires infrastructure.*
- *The degree of reliability of DDB is 95% during the first month of use, rising to 99.9% from the second, improving with each learning.*
- *The brain accumulates all the improvements received by our customers around the world. This keeps you up to date. By reducing up to 85% of the time spent on non-value tasks, your employees can focus on value activities, be happier and your company more competitive.*

What do I have to do to have it in my company?

Five simple steps:

- 1. Sign up for our service.*
- 2. Provide us with your connection preferences and data to extract.*
- 3. Send us some sample documents to verify performance.*
- 4. Connect the API to your ERP(*) or use the integration tool.*
- 5. Start processing your invoices unattended and automatically.*

*DOST commits to start processing your invoices in less than 3 weeks(**) from the signature of the contract.*

(*) Integration service not included in the scope of the DOST team, providing all technical information about the integration API to the customer or to the development services company designated by the customer.

(**) Does not include the integration work to be done during this time, as it will be paid by the customer.

Prices

Starter

- 500 invoices/month
- Automatic processing of vendor invoices
- Integration with email for invoice extraction
- Integration with cloud storage (Google drive, One drive or Dropbox)
- Secure cloud
- Invoice data extraction with AI

500€ / month

Pro

Starter plus:

- 501 to 1000 invoices/month
- Predefined ERP integrations
- Predefined accounting software integrations

800€ / month

Premium

For companies with a high volume of incoming invoices that need a customized solution.

Pro plus:

- From starting at 1001 invoices/month
- Custom integrations
- Custom AI models
- Workflows
- Automation of verification processes

From 0,7€ / doc

Prices do not include VAT

Software-as-a-Service model with monthly or annual recurring payments

What do our customers say?

"Since our foundation, we have always been committed to innovation as a basis for the improvement of our service. Thanks to Dost and its Artificial Intelligence, we have managed to improve our performance in the back office, reducing human error to zero and improving the speed of administrative tasks. Having a solid and reliable working tool for such a delicate area is a great advantage with which to face growth with greater security. "

Julian Jimenez
CEO

"Dost is not only a tool to reduce our workload and tedious tasks, the best part is that it has allowed us to improve internal processes down to the smallest detail and make our company more agile, efficient and scalable; which translates into better satisfaction for all our collaborators and a substantial reduction in costs.
