Amphorica AirOptimizer™

Smart, data-centric software for Air Freight Optimization and Air Cargo Process Improvement.

Benefits

- Gain better control over your Air Freight operations;
- Plan and execute more accurately and more efficiently;
- Solve problems easily and quickly;
- Visualize, understand and control in a better way every operation through your (existing) operational data;
- Preemptively avoid risky situations, minimize loss and improve business resilience in critical times;
- Provide better, more competitive service levels while improving your profits.

Benefits multiple stakeholders.

From senior company management to field managers to operational employees, such as agents and couriers all the way to your customers (senders).

Fully customizable to fit your specific operations

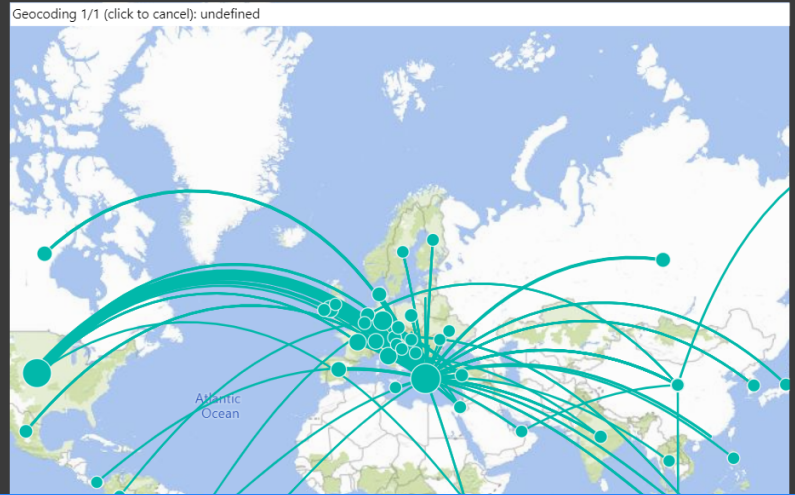

Available 24/7 from anywhere in the world (real time)

Easy to set up and easy to use

Amphorica AirOptimizer™

Benefits multiple stakeholders.

Easily and seamlessly connects and integrates with your existing IT management systems: ERP, TMS, WMS, and more.
Or Upload your data securely or Easily connect to your data repository.

Features

01 Vendor and suppliers comparative benchmark

Vendor and suppliers comparative benchmark. See the big picture: Compare your airline cargo vendors. With AMPHORICA AirOptimizer, you can now clearly and easily see and compare performance and KPIs such as cost, quality, delays, agent and broker responsiveness.

02 Predictively project and forecast your upcoming demand

Do you want to know how to prepare for what's coming? How many packages do you need to deliver? How many resources for the project? With Amphorica's AirOptimizer predictive capabilities.

Be ahead of the game. Improve your resilience and be prepared for any event.

03 Operational insight

The system tells you what are the operational changes you should do. Automatically extracts operational insights such as: realignment and better allocation of resources, process improvements and recommendation for optimal decision making. This enables you better quality assurance for GDP compliance for example.

04 Get specific insight any time

Click on any customer data and get insights on their specific. From your most profitable customer to those who need more attention. Look at the customers with high activity levels all the way to the smallest customers with growth opportunities. Look at the data and allocate your resources accordingly. By different time frames: daily, weekly, monthly or annually. Issue a report on any time interval.
