

# inter – Face: Core Banking Platform

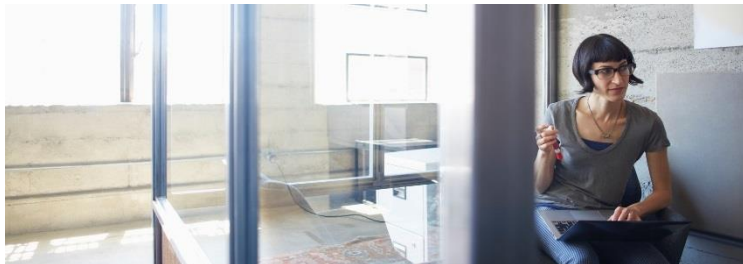

# Industry Situation

## Challenges

- Developing and delivering new/existing products and services in order to expand market share and increase revenue in the shortest time possible
- High competitive environment in banking
- Increasing operational cost due to complexity of core banking software
- Performance and Integration problems
- Heterogeneous environments
- Slow time to market
- Missing complete picture
- High TCO

## Ideal Solution

Financial institutions are looking for customer oriented, scalable and secure core banking systems which support all business lines:

### ***inter-Face***

- Easy integration with other modules and 3rd party systems
- Agility by parametric management
- Customer centric
- Scalable and multi-layer architecture

## Desired Outcomes

- Increase agility and flexibility by parametric management
- Reduce costs by customer oriented, easy to use design and web based architecture
- Decrease operational risks by easy integration with other applications and modules
- Product, transaction, process and authority management
- High accessibility, performance and security
- Supports all business lines

# Intertech – inter-Face

INTERTECH offers Core Banking solution, **inter-Face**, to leverage your current capabilities while increasing both service level and operational efficiency by combining over 30 years of banking experience

## Parametric Infrastructure

- Scalable multi-layer architecture
- Parametric structure that is easily adaptable to new products
- Agility due to flexible product factory and parametric management

## Easy integration

- Easy to integrate with 3rd party software
- Fully integrated with the BPM Module, CRM and document management systems.

## Operational Efficiency

- Easy maintenance and management
- Operating Process Management methodology
- Web based, n-tier architecture
- Modern design developed with state-of-the-art technologies

## Scalability

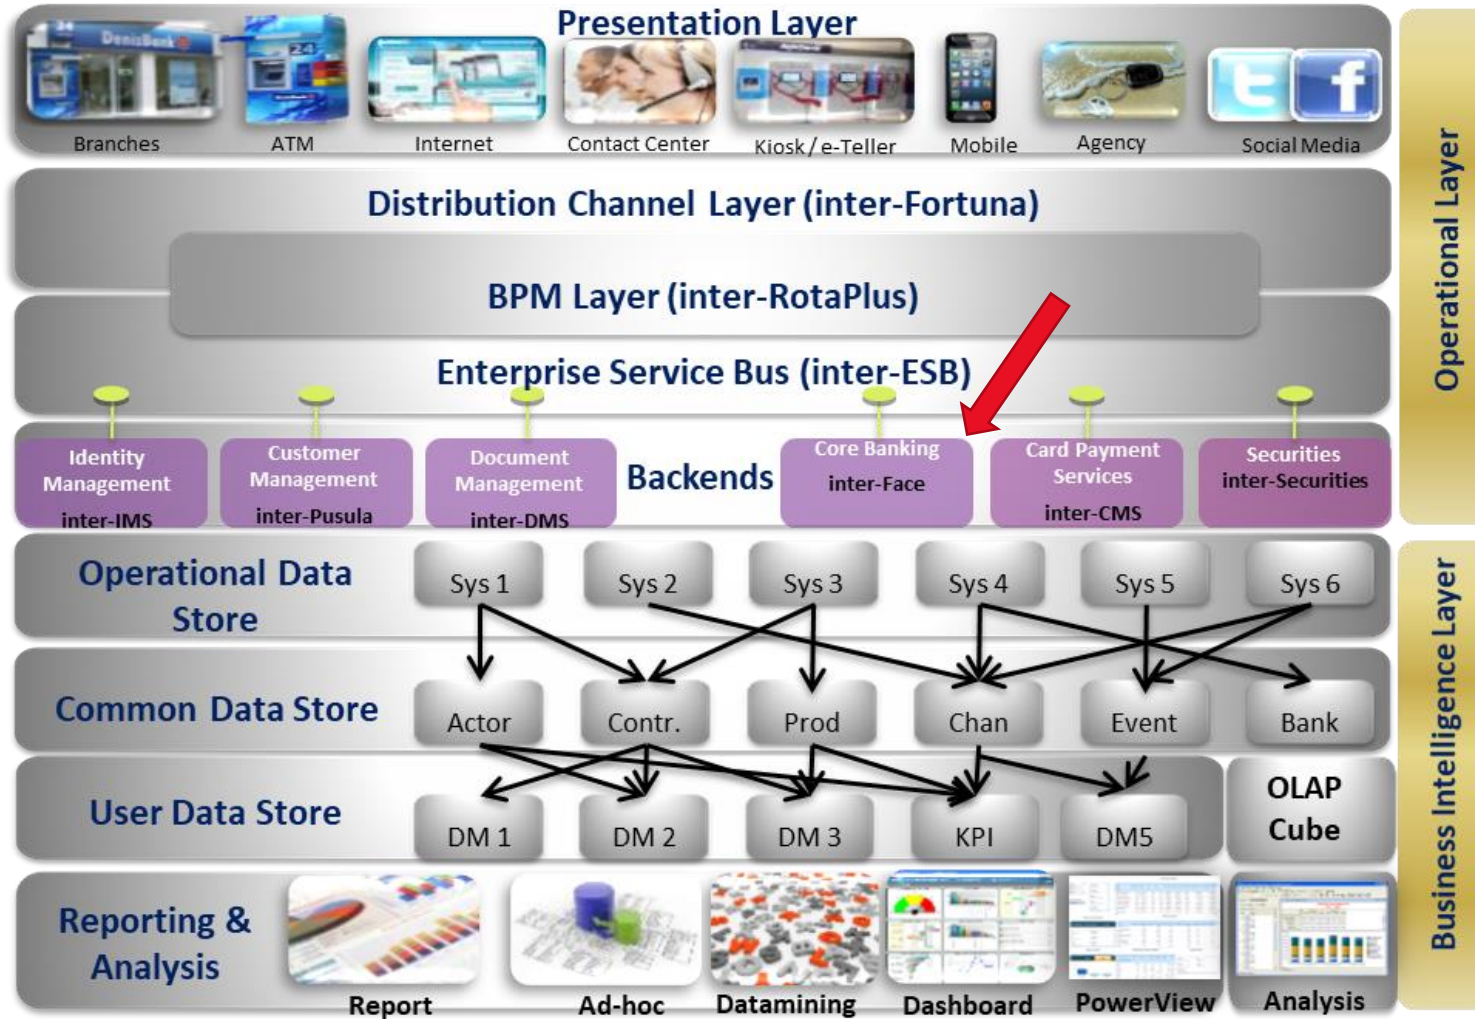

- Scalability from one branch to thousands of branches with hundreds of millions of transactions per day.
- Supports Retail Banking, SME Banking, Agricultural Banking, Corporate Banking, Public Finance and Private Banking

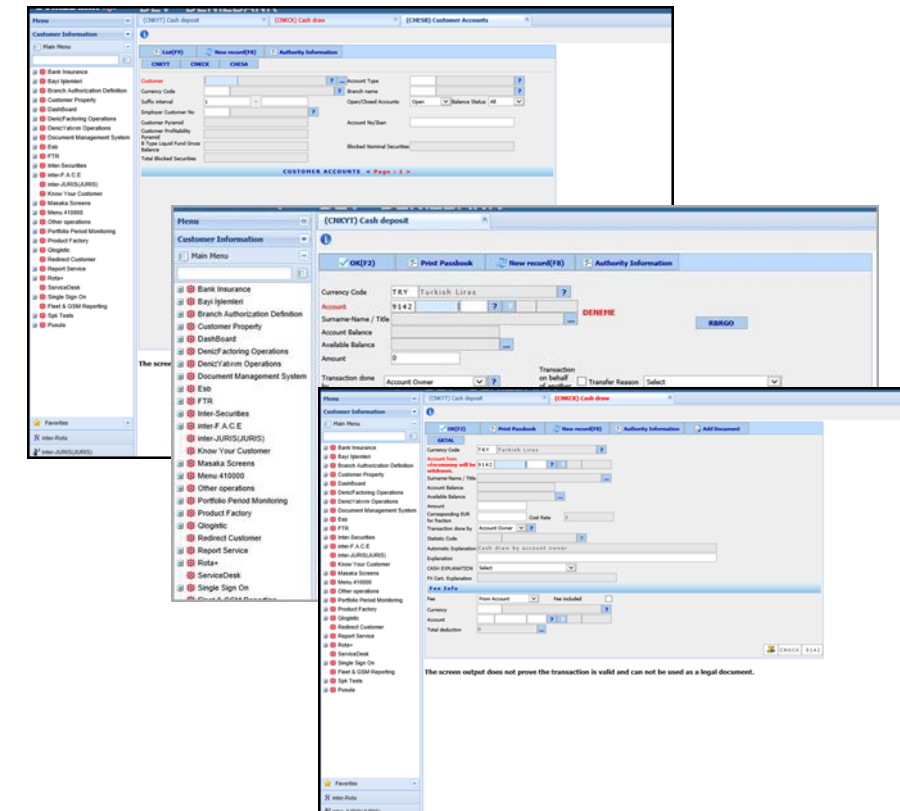

**inter-Face Core Banking System is available on Cloud**

**System also supports hybrid deployments, i.e. For highly regulated countries, at least development and test environments can be deployed on Azure**

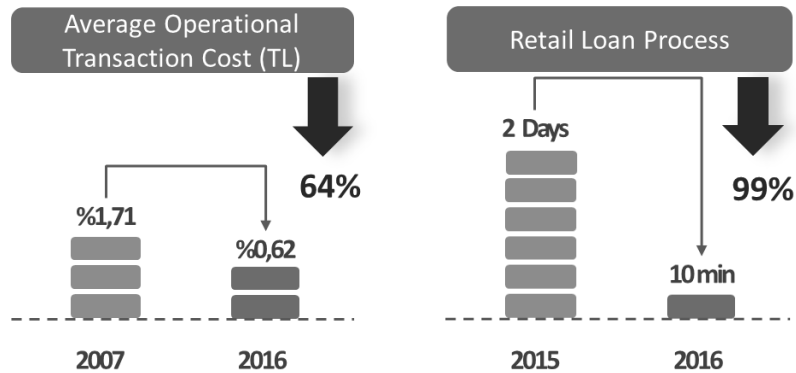

# inter-Vision State of Art Architecture

## Screen Samples

# Customer Success Story
