

Company Overview

Who is SiriusIQ™

SiriusIQ™

© 2018 SiriusIQ. All rights reserved.

SiriusIQ is the inventor of *The New Way™*, a transformational process of re-engineering human-based workflows into machine-time-based workflows while leveraging and focusing on the limitless capabilities of digital labor through next-gen micro-services running on Microsoft Azure.

The New Way process integrates human workers when needed for oversight, authorization, validation and exception handling.

The first offerings of *The New Way* process focus on improving a variety of data migration workstreams.

THE ANCIENT WAY

Think: 1990's

- Paper-based information
- Human workers had all the knowledge and did all the work

THE OLD WAY

Think: Now

- Digital-based information
- Human workers still have most of the knowledge with some digital automation

THE NEW WAY™

Think: The way it *could be* now

- Digital workers hold the knowledge and work on machine time 24/7
- Human workers assist digital workers

This is true digital automation.

The background is a dark blue field filled with a complex network of thin, wavy lines in various colors including blue, yellow, orange, and pink. Scattered throughout this network are numerous small, semi-transparent circles in shades of orange, yellow, and white, creating a sense of depth and movement.

The New Way™

Move Data with Speed While Delivering Fidelity, Telemetry and Auditability
for Complex Data Migrations and Workflow Automation

The New Way™

A Comparison

Telemetry		Data Fidelity		Automation	
 <p>The New Way</p>	100% telemetry See migration statistics in real time Report results throughout migration Full audit capabilities	 <p>The New Way</p>	99.9% Virtually NO loss of data & IP	 <p>The New Way</p>	Managed code Cognitive capabilities Automate the process in real time Processes run in parallel
<p>The old way</p>	Little to no insight on data activity during migration	<p>The old way</p>	Average 80 – 85% potential loss of data & IP	<p>The old way</p>	Script-based Linear Human labor dependent

The New Way™

Key Features

Cloud-born

Conceived for the cloud to deliver maximum scalability, reliability, security and compliance

AI and Bot Technologies

Serious intelligence drives the process lifecycle from kick-off to reporting

Automation + Intelligence

Dynamic workflow engine plus intelligence to interpret intent and route process

Robust Reporting and Analytics

Real-time insights and telemetry speed decision-making and analysis

Intelligent Conversation

AI-wrapped conversation detects sentiment and intent to automate communication, queries and more unified across multiple channels

Dashboard and Inbox

Manage conversations, reporting and activities across devices

The New Way™

Security

Solution is fully in Microsoft Azure, which carries the most regulatory compliance of any cloud provider. (SOC2 Type 2, NIST etc.)

Solution features government-level -encrypted, end-to-end compliant transports.

- Example: Nine-company Australian migration meeting government sovereignty laws. Securely moving emails within the four walls of Australia per government regulation.

SiriusIQ has third-party attestation assuring security compliance.

Solution features the highest level of telemetry in the industry—every line of code is wrapped with application insights, affording amazing, up-to-the-second telemetry on all processes.

SiriusIQ™ Solutions

Cloud Correct™

(Sector Solutions for Digital Labor)
Design, architect and deploy a secure, compliant cloud solution to reinvent the enterprise.

Automate Correct™

(Automation Patterns for Digital Labor)
Automate through digital labor; leverage human interaction for oversight, validation and exception handling.

Migrate Correct™

(Migration Patterns for Digital Labor)
Touch ALL of the data: learn from it, ingest it, understand it, use it.

Current Industries:
Healthcare
Financial
Oil & Gas

The New Way™

Results

Migrate Correct™

- Three 9's fidelity
- 100% telemetry captured, ultimate audit trail
- Coexistence and multi-tenant coalesce, and tenant-divide
- Managed code in parallel, no scripting

Automate Correct™

- Machine-time transformation
- RPA as an end point
- Humans as SMEs

Cloud Correct™

- SOC II, NIST compliant
- True micro-services
- Silo agnostic
- Instanced and secure
- Parallel asynchronous design
- Elastic scale

SiriusIQ™ OFFERINGS

Migrate CorrectSM

AD Assessment,
AD Domain Controller,
Testing Azure AD

Migrate Correct

AD Consolidation
(In development)

Migrate Correct

SAP Intelligent Migration
(In various stages of
development and production)

Migrate Correct

OneDrive for Business,
Tenant to Tenant,
On-prem to Tenant

Migrate Correct

SharePoint
Online, On-prem

Migrate Correct

Exchange Tenant to Tenant,
On-prem 2007 SP1-Current

Migrate Correct

Dynamics 365
(In design, development)

Automate CorrectSM

Machine-time Workstream
Transformation
and Execution

A group of people, including a man in the foreground with a beard and a woman, are looking at a large screen. The screen displays a complex interface with code, data, and a diagram. The scene is dimly lit, with the screen providing the primary light source. A pink rectangular box is overlaid on the screen, containing the text "MIGRATE CORRECT™".

MIGRATE CORRECT™

MIGRATE CORRECT™

Migration Challenges

MIGRATE CORRECT™

Features

The New Way™

Move data with speed while delivering fidelity, telemetry and auditability

99.9%

Three 9's fidelity

100%

One Hundred Percent telemetry captured, ultimate audit trail

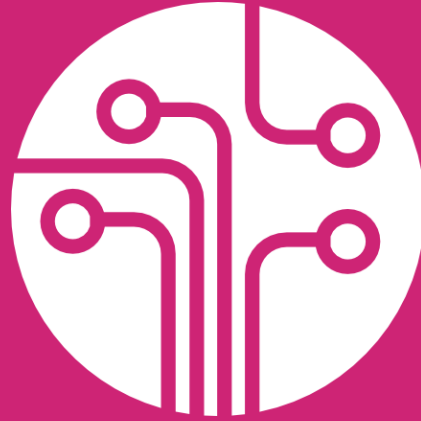

Coexistence and multi-tenant coalesce, and tenant-divide

Managed code in parallel, no scripting

SUCCESS STORY

CUSTOMER

A Tier 1 pure play integrator, which operates in the IT services industry with over 200,000 employees in the private and public sectors across the globe.

CHALLENGE

Migrate thousands of mailboxes from multiple companies to one O365 Azure instance in 6 weeks.

Minimize business disruptions, navigate tight timelines and address legal and government security and compliance issues related to in-country data regulations during end-user data migration.

SOLUTION

Using the SiriusIQ™ Data Migration Factory, we attained high levels of end-user satisfaction for Exchange and O365 with minimal disruptions while maintaining a 99.9% migration accuracy.

BUSINESS BENEFITS

Significantly reduced costs associated with integrating systems.

AUTOMATE CORRECT™

AUTOMATE CORRECT™

Workflow Automation Challenges

HUMAN LIMITATIONS

- Business processes requiring heavy human intervention
- End user resistance to change
- Disposition of the data collected by automated processes
- Privacy and security concerns
- Management engagement

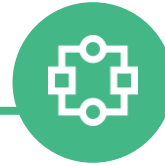

LEGACY SYSTEMS

- Legacy systems prohibiting cost savings and inability to capture market opportunities
- Interoperability with existing management systems
- Defining complex processes
- Technical implementation costs

WORKFLOW AUTOMATION

Benefits

- Improved efficiency
- Improved accountability and visibility
- Reduced number of errors
- Streamlined processes
- Superior control, scalability and increased flexibility
- Improved communication
- Employee motivation
- Integration and real-time reporting

AUTOMATE CORRECT™

Features

The New Way™

Dynamic workflow engine with intelligence to interpret intent and route processes

Machine-time transformation

RPA as an end point

Humans as SMEs

SUCCESS STORY

Migrating several companies' data into one becomes an automated, optimized process that is AI-driven.

CHALLENGE

Rapidly migrate acquired companies' email solutions to a single O365 tenant.

SOLUTION

Use **SiriusIQ™ Azure born** solution to migrate all email and files to O365 & OneDrive **in parallel**.

Azure Service Fabric, Redis Cache and Cognitive Services provide an **AI-based, secure data migration factory**.

BUSINESS BENEFITS

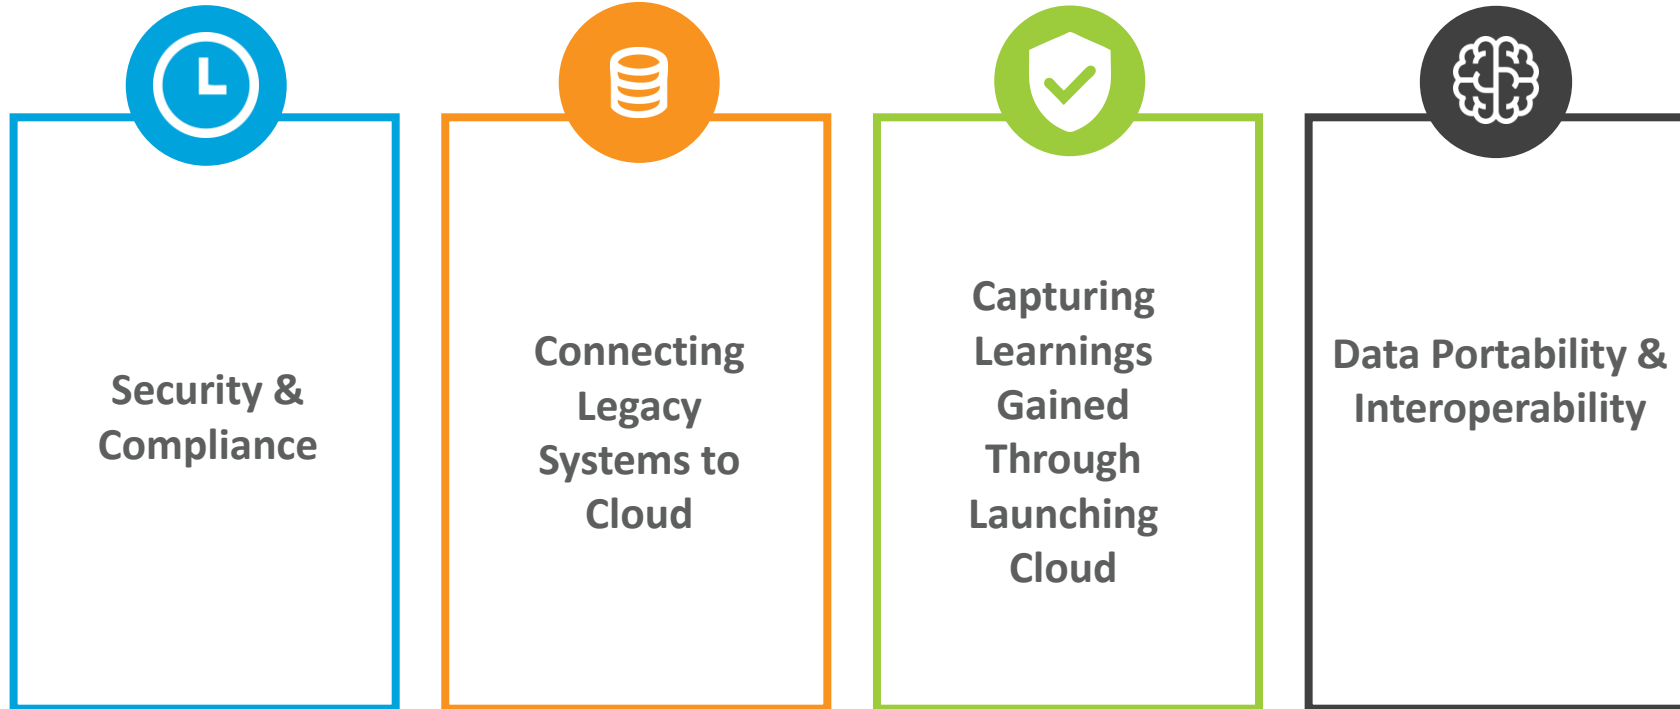

- Up to **10x performance gains**
- **Complexity of migration—simplified**
- **Interact with AI** and watch **live project plan** updates while migration is happening.

The background is a dark blue gradient filled with numerous vertical lines of varying heights and colors, including yellow, orange, red, purple, and light blue. Interspersed among these lines are many out-of-focus circular bokeh lights in similar colors, creating a vibrant, digital, and data-like aesthetic.

CLOUD CORRECT™

CLOUD CORRECT™

Cloud Adoption Challenges

CLOUD CORRECT™

Benefits

The New Way™

Conceived for the cloud to deliver maximum scalability, reliability, security and compliance

SOC II, NIST

True micro-services

Silo agnostic

Instanced and secure

Service Fabric,
Service Bus,
CosmosDB,
Redis Cache,
Azure SQL

SUCCESS STORY

Secure email migrations meet tough government regulatory requirements.

CHALLENGE

Migrate sensitive email systems after an acquisition, risking regulatory compliance.

SOLUTION

In-country Azure instance is dynamically created establishing **secure transport** with full visibility using application insights.

Azure VPN Gateway, Service Fabric and Key Vault ensures a fully **encrypted path** for data.

BUSINESS BENEFITS

The SiriusIQ™ solution resulted in the most **secure email migration** while **remaining compliant** and in country rules.

The overall migration **time was reduced by weeks** due to performance and **dynamic standup of infrastructure**.

ALL ROADS LEAD TO THE CLOUD

A migration is just the starting point!
- Migrate Correct™

A problem with traditional migrations is they
begin and end.

- SiriusIQ views a migration as the ultimate opportunity for land-and-expand.
- Our migration content graph, as a result of a migration, is the initial blueprint for machine-time transformation.
- Identify green-field opportunities without having the green-field discussion.
- Machine-time workstreams execute on Azure!
- Automate Correct™
