COVER3™

Intelligent surveillance using cognitive analysis to alert organizations of potential security threats.

MONITOR

COVER3™ surveils persons of interest, assets or objects from any camera.

ANALYZE

Cognitive analysis identifies matches using facial, object and voice recognition.

NOTIFY

Authorized personnel receive notifications when events match set criteria.

KNOW WHAT YOU DON'T SEE

COVER3 identifies whatever you tell it to — persons of interest, known or suspected terrorists, missing persons, even license plates and weapons — protecting citizens, corporate assets, our nation's border and critical infrastructure.

WHAT IS INTELLIGENT SURVEILLANCE?

The use of artificial intelligence to comb through vast amounts of data, identifying associations, patterns and threats while improving the application's ability to recognize people, places and objects.

MANY USE CASES

ACCESS CONTROL

PERIMETER SECURITY

EVENT SECURITY

AIRPORT SECURITY

LAW ENFORCEMENT

BORDER PROTECTION

AERIAL RECONNAISANCE

MISSING PERSONS

COUNTER INTELLIGENCE

SECURITY + PRIVACY + ACCURACY

Securely conduct mission operations in real-time while minimizing false positives, maintaining compliance and individuals' privacy.

- AES 256-bit encryption in flight, at rest
- Configurable confidence levels
- Increased accuracy using 240 images per individual
- Configurations to support different federal, state and local privacy laws
- Persons of interest (POIs) are imported from authoritative sources
- Configurations ignore or forget individuals not on a POI list
- Rules-based surveillance around specific threats
