Telemedicine with Medical Complication

With ClinicONE™ core module Telemedicine, the teleconference function allows health care professionals to evaluate, diagnose and provide treatments for patients at a distance using telephony and strictly compliant to US' HIPAA (Health Insurance Portability & Accountability Act) standard. The setup is simply using a secure browser environment & a patient mobile app Health•Me2™ which connects between the doctor & patient with a secured electronic medical record for precise advise and diagnostic online. The telemedicine service has been widely adopted throughout the COVID-19 pandemic. The greatest advantage of telemedicine is that it avoid cross-infection during the pandemic by limited physical visitation in clinic environment. The new service also provide time-efficient & short waiting time compared with the tradition physician and caregiver consultations.

Next Generation ● Smart Clinic

Market Demand

In view of the need of telemedicine market, our company aims at establishing a one-stop healthcare diagnostic platform for precise medical treatments, seamless clinic operations & secured electronic health record management prepared for new generation of Smart Clinic.

Auto Patient Reminders

To avoid mis-appointment, all confirmed bookings will be double confirmed and direct reminder messages to individual patient via Omni-channel i.e. WhatsApp, WeChat, In-App, SMS & email to ensure patients will not miss out appointments.

Compatible with Multi-Devices

ClinicONE^{TM} platform provides an world-class security level standard for multiple type of device access for clinician's works anytime, anywhere by any device.

Patient as an Asset

In order to protect patients' personal data, our online platform fulfills the top security standard ISO27001 & our patient health record is fully compliant with HIPAA standard. By using our service, doctors or practitioners can mitigate the risk of data leakage without any concern.

Avoid Cross-Infection	Reduce Unnecessary Clinic Waiting Time	Time-Efficient and Treatment Effectiveness
