Industry Situation – The Pension Verification App System is a solution developed to be used by pension organizations, Insurance organizations, Banks, etc.

Lotus Beta Analytics
NIGERIA LIMITED

Challenges

Errors.

Non confidentiality.

Manual: Complex process.

No verification.

Using username/password to authenticate users is no longer enough in terms of security. As more and more services are going mobile, it can be frustrating to type a long and complicated strong password.

Ideal Solution

- Scalable
- Social Distancing
- Guarantee better security, safety & privacy for their organization

This solution eliminate the need for users to physically go to the pension office for their verification. It improves the security of Pensioners by Providing two-Factor Authentication(Jwt Authentication and Face login)

Desired Outcomes

Improved Security

Improved collection and protection of data

Improve and increase the efficiency in verifying users.

- Effectively control track and Verify Users.
- Prevent any entry of unauthorized or unwanted persons in the premises.
- enables convenient and secure authentication that is easy to use without the need of additional hardware.

Lotus Beta Analytics Nigeria – Pension Verification Application

To verify pensioners, easily, securely and efficiently.

Scalability

It is highly flexible and scalable.

- Can be customized to fit any business process.
- Easy to use,
- Two Factor Authentication

Improved User Security

Gives adequate visibility

- Strong,
- Convenient
- helpfulness

real-time eKYC

Checks user Presence

- Prevents Fraudster trying to impersonate the user
- Matches image with user Id. This way, it can be clarified whether the user ID belongs to the person presenting it.
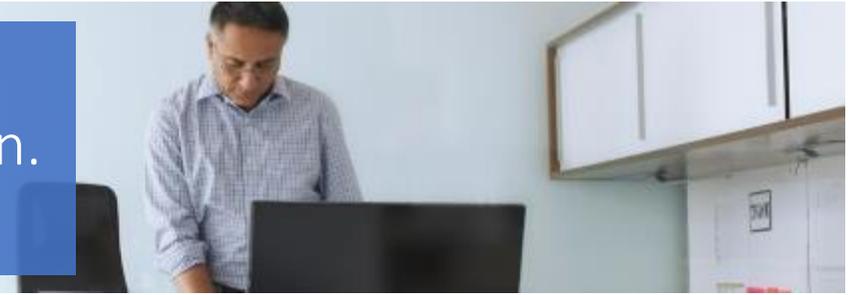

Compliance

Enables compliance to government rules as regards data and enterprise data policies

- Data privacy is ensured.

Lotus Beta Analytics Nigeria, Our solution allows maximum control and selective access to buildings and centralized security.
