

Clinical
Documentation
Improvement

Clinical documentation is at the core of every patient experience. But to be meaningful, information must be timely, accurate and panoramic. CDI not only impacts the entire continuum of care—it improves your financial health, too.

What makes a successful clinical documentation improvement program?

ChartWise. The convergence of clinical documentation and coding processes is critical to a strong revenue cycle and, more importantly, to enhanced care management. Our software solutions aggregate and summarize data by population, allowing healthcare providers to manage processes, assess risk and optimize care.

Immediate ROI
Quality Reporting
Physician Report Cards
Fewer Denials
Revenue Integrity

People + Processes + Technology

Meticulous Records

Coded Data

Boost your return on input.

ChartWise understands that clinical and payment models are inexorably shifting from fee-for-service to pay-for-performance. Because of this, we know the specificity and accuracy of clinical documentation is key to receiving appropriate payment for care provided, determining clinical acuity and reducing audit and compliance risk.

Perform like the hospital you are.

Our software supports all aspects of a CDI program, which no healthcare organization can afford to go without, from managing census and worklists to reviewing, querying and reporting.

Formulate

clinically-appropriate
documentation queries

Enhance

productivity among
CDI and clinical staff

Improve

eligible revenue
capture and
risk-adjusted
payments

Reduce

reimbursement
denials

Increase

coding accuracy

Remove

the friction between
clinicians and
documentation
specialists

With ChartWise, healthcare providers can claim complete reimbursement. We analyze each clinical condition and calculate risk adjustment factors, eliminating any documentation gaps.

Get out what you put in.

No condition documented
or patient not seen in

Total Payment	\$23,716

Full picture.

Full payment.

Get in tip-top financial shape.

ChartWise
makes it
easy with:

Enterprise-wide reporting in real time

See how your CDI program is performing from every dimension and across your entire organization. Our role-based dashboard reveals insights from clinical, financial and documentation perspectives—all on-demand.

Efficient documentation

ChartWise identifies problems in charts and asks the right questions to address them, accelerating claim submissions and payments while also saving staff time. No more scrambling with clipboards.

Comprehensive cash flow

Accuracy yields revenue, so ChartWise ensures correctness. We get 100% reimbursable claims out the door faster, resulting in fewer denials of payment.

An inpatient-to-outpatient continuum

Inpatient and outpatient facilities have unique sets of needs. ChartWise offers a product so powerful, we can leverage providers' combined efforts to meet them both.

Easy integrations

ChartWise will talk to any EMR system you have in the healthcare setting.

Better patient care downstream

Your patients deserve perfect records. Complete, reliable documentation improves their every encounter with care providers in their treatment plans.

For the record,
we do CDI best.

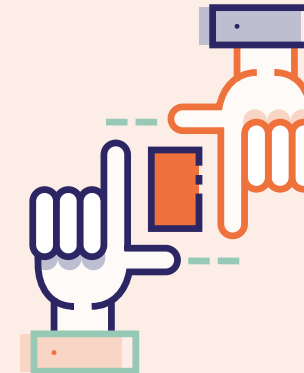

We're best-in-KLAS three years running.

ChartWise continues to lead the field, once again earning us the distinction of KLAS Category Leader in the CDI Software segment in 2018.

Better documentation.

Improved productivity.

That's ChartWise.

We're bridging the gap between clinicians and documentation specialists.

Using lab data, medications and procedures to help find complications and additional diagnoses, ChartWise completes the diagnostic picture for timely reimbursement.

Seamless analytics tell a powerful story.

Our award-winning CDI solutions offer complete, end-to-end visibility into clinical documentation program effectiveness and financial performance.

Complete reimbursement.

For ChartWise,
CDI is our only thought,
not an afterthought.

We believe clinical documentation is at the
center of quality patient care and financial health.

MAKE IT YOUR FIRST STEP.
