

Voter Registration

BPro's **TotalVote®** Voter Registration System is currently used by Hawaii, New Mexico, North Dakota and South Dakota to help streamline the voter registration process for state and local election officials. Every BPro TotalVote system has the same core, but each state's VR system has been configured to meet the unique laws, regulations and standards.

TotalVote is not only a statewide voter registration list, but a full voter administration package. The system includes several confidential fields, including driver license numbers, dates of birth, social security numbers and other information. Providing functionality and security for the system is a high priority.

TotalVote Voter Registration provides the ability to efficiently manage all Voter Registration information, which is often time-consuming, costly and inefficient. Election officials around the country use TotalVote to:

- Validate a voter's eligibility
- Track a voter's history
- Maintain an accurate voter registration database
- Reduce the number of staff necessary to process data
- Increase the speed and accuracy of data processing

Voter Registration

BPro's Voter Registration technology advantages:

Cross checks voter records with any state database to check deaths and felons or validate driver license and social security numbers. Also compatible with ERIC and other federal and multistate voter lists.

Simplifies the EAC survey requirements by automatically collecting all required data and exporting in the approved format so data doesn't have to be reentered.

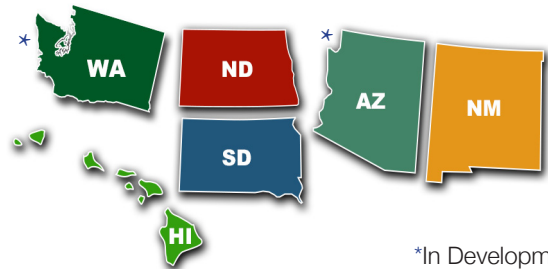

Streamlines all absentee ballot requests: online, by-mail and in-person.

Registration cards, petitions, obituaries and other voter correspondence **voter records are catalogued and easily accessible to election administrators.**

Quick Search and Advanced Search options allow administrators to search individual voters or by group, such as voter status, county, city, zip code, party and middle name. Easy export to Excel (CSV) and PDF.

Merging and unmerging **minimizes duplicates within the system.** Possible duplicates are flagged and categorized allowing the counties to process.

TotalVote comes with a comprehensive list of reports and labels and the data generator allows users to **create almost any customized report.**

Election Software Clients for Voter Registration

about BPro

BPro Inc. is a premier election services company with a successful track record of providing cloud-based solutions to states and localities across the country. Our TotalVote software supports all methods of online and offline voter registration and list maintenance, election management, election night reporting and the myriad of interfaces necessary to maintain accurate registration rolls in the modern, mobile information environment. TotalVote technologies have been deployed in over 57 statewide implementations since 2008, as well as hundreds of local elections. Despite our vast experience with elections of all sizes, TotalVote remains flexible to the needs of each individual jurisdiction's laws, statutes, workflows and best practices.

BPro's corporate office is located on the spacious plains of Pierre, South Dakota. For more information, visit www.bpro.com.
