## Online Voter **Registration**

Online Voter Registration systems present problems and opportunities for election administrators. Most days, only a handful of voters will access a system to register to vote or update their information. Then, as election approaches and a registration deadline looms, systems and servers get overloaded. Smaller localities have seen over 10,000 logins in a single day. In larger jurisdictions, over 500,000 voters may login to check their registration status or register to vote for the first time. This drastic user fluctuation can present problems to election officials. BPro has the solution.

BPro has the experience and proven technology to provide a secure, reliable Online Voter Registration system that scales to your unique voter demands. Securely hosted on the Microsoft Azure cloud, the system is easy to administrate, affordable, and allows voters to register to vote and manage their voter information, no matter how many users are in the system. Once submitted, voter's identity is verified through the DMV and a digital signature is added to the voter's record. With BPro, a voter's registration is processed seamlessly and securely.

™ TOTALVOTE is a trademark of BPro, Inc

# Online Voter Registration

BPro's Online Voter Registration technology provides:

## Clean and Accurate Voter Files

Linking to the DMV database and street index files allows the system to verify a voter and automatically match the voter's address to the correct precinct.

## Transparency and Voter Confidence

By providing voters with access to their voter file, they can track their registration as it is processed and make updates anytime.

## Cost Savings

By avoiding manually processing every registration, California estimates that online voter registration saves an average of \$2.34 per voter registration.

## Multiple Levels of Security

Logins, Ubikeys and Active Directory Networks are a few of the ways BPro ensures all registration administration by authorized staff only.

## Access from Anywhere

By providing a mobile friendly environment, the BPro solution ensures that voters can register to vote and access their voter information from a computer, tablet or smart phone.

## Election Software Clients for Online Voter Registration

## about BPro

BPro Inc. is a premier election services company with a successful track record of providing Cloud-based solutions to states and localities across the country. Our TotalVote software supports all methods of online and offline voter registration and list maintenance, election management, election night reporting and the myriad of interfaces necessary to maintain accurate registration rolls in the modern, mobile information environment. TotalVote technologies have been deployed in over 50 statewide elections since 2008, as well as hundreds of local elections. Despite our vast experience with elections of all sizes, TotalVote remains flexible to the needs of each individual jurisdiction's laws, statutes, workflows and best practices.

BPro's corporate office is located on the spacious plains of Pierre, South Dakota. We have satellite offices near Fargo, North Dakota, Marshall, Minnesota and Washington, DC.
