

Zensar's Archive to Cloud in Azure

Zensar is a leading digital solutions and technology services company that specializes in partnering with global organizations across industries on their Digital Transformation journeys. Zensar has a global footprint and worldwide presence in US, Europe, Africa, and APAC with over 35 sales and delivery locations across industries.

See what customers are saying:

"We were delighted to have Zensar as a trusted backup partner. Prior to Zensar, we struggled with our tape-based legacy solution's unreliability, slow performance and time-consuming upgrades. We were spending 15 hours per week just managing the system. Zensar's team worked closely with us and implemented a comprehensive Azure based Archive solution using Industry best practices. Today, our archives are completed in minutes, and we no longer need to move physical tapes"
– CTO, Minerals Company

WHAT WE OFFER

Zensar's Archive to Cloud uses the Azure's self service (RBAC), real-time predictive search, intelligent tiering and automation capabilities to provide a secure, low-cost, near zero RTO archive solution that gives you easy access through consolidated single glass of pane. The solution leverages the following Azure services to provide a strategic archival foundation -

- 1. Azure Blob (LRS or GRS or ZRS):** These redundancy options provide you with highly available data storage capabilities of at least 12 9s.
- 2. Azure Express Route:** ExpressRoute lets you extend your on-premises networks into the Microsoft cloud over a private connection with the help of a connectivity provider.
- 3. Azure Backup Agent:** Collects data and sends to Azure.
- 4. Azure Policy:** Backup based on user defined policies.
- 5. Azure Monitor:** Comprehensive solution for collecting, analyzing, and acting on telemetry from your cloud and on-premises environments.
- 6. Azure Portal:** Management interface for all Azure resources.

Zensar's Archive to Cloud is differentiated by its agility and the flexibility to work with any backup technology and any workload as per client needs.

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
