

# Zentity Digital Gateway

Faster deployment of your applications

## Mobile banking – innovative, secure and ready to go–live

Digital Gateway is aimed at offering a safe, secure connection between your existing core systems and the digital applications you provide your customers. Tried, tested, and deployed at several major banks and telecommunication companies, Digital Gateway is both a flexible enabler of your digital opportunities, and a bullet–proof shield allowing your organization to take advantage of mobile connectivity and services without worrying about safety and security.

## What Zen:Gateway integration framework delivers:

- Lower costs and speed deployment with pre–built back–end serviceCommunication based on SSL/TLS protocol, with validation of SSL/TLS layer
- High security, easy and quick integration
- Support of development, staging, and production environment
- Cross–platform support
- High level of user’s comfort of your mobile solutions

- ✓ Client authentication
- ✓ Service activation process
- ✓ Session management
- ✓ Audit logging
- ✓ Push Notifications
- ✓ Static data hosting
- ✓ Throttling
- ✓ Mapping to internal services: SOAP, REST, JSON, DB, J2EE, .NET etc.

Zenity is a mobile solutions provider who develops and markets enterprise grade mobility applications and frameworks for a variety of industries.

Our core product, Zen:Gateway, is a pre-built module that augments the back-end for any mobile application. Every full-featured and secure mobile application requires this type of middleware (also known as mBAAS or PAAS).

Zenity's portfolio of solutions and services span many Fortune 500 customers across numerous industry segments, including finance/banking, telecommunications, high tech, manufacturing, and more, all across numerous mobility platforms such as iOS, Android, and Windows 8.

Major **FORTUNE 500** customers
