Multiple Residence

Enriched data set for PAF® adds 800,000 extra addresses for multiple occupancy buildings with single point of entry such as flats, offices, student halls of residence and assisted living properties.

GeoCoding

New for 2021
Convert physical address data to latitude and longitude for online store locators, and provide accurate rooftop positions for logistics and delivery routing.

Data Cleansing

New for 2021
Our data cleansing gives you peace of mind that your existing data is as clean as the new data you capture. Full batch processing of addresses, email and phone numbers with validation.
