Inventory Levels
- ↑ **10% - 50%**
OTIF Delivery Performance
- ↑ **10% - 50%**
Capacity Utilization
- ↓ **Days → minutes**
S&OP Preparation

Secure your business with ICRON S&OP and be on your way to a resilient and sustainable future

Scenario Analysis

- Simulate and compare current and future circumstances with data-driven and collaborative scenario analysis
- Evaluate and proactively manage risks and opportunities for increased resilience
- Balance the need to optimize costs with the need to create resilient and agile supply chains to respond to future uncertainties

Collaboration

- Rapidly generate optimal plans that satisfy sales forecasts and customer demands; minimize production and procurement costs, and meet operational constraints
- Achieve seamless cross-functional collaboration, harmonize supply and demand
- Create a single source of truth that serves as a foundation for end-to-end supply chain orchestration

Always On

- Optimize S&OP processes in real time
- Use market insights, customer collaboration and AI/ML to foresee and shape demand
- Fast implementation & full integration with existing solutions
- Highly configurable and easy to use
- SaaS, On Prem and Cloud deployment options
