Axicos AG
Carizma
Contract Life Cycle Management

![axicos logo]

Manage B2B contracts across several departments and locations over a long time - easily, intuitively and reliably

axicos

Challenges

Successfully managing a portfolio of B2B contracts is complex and requires collaboration between many functions and sites.

Significant value is at risk when contractual obligations are missed.

"We entered a development deal with a start-up. Some years later - our team members had all moved on - we failed to budget for milestone payments and missed a report. The start-up used this to negotiate a higher royalty."

Ideal Solution

The ideal system blends in with your familiar work environment. Without much training, it facilitates collection and delivery of relevant information and documents, supports collaboration and monitors due dates, obligations and risks.

"My day is complex enough; I don't need a new tool that forces me to perform tasks just for reporting purposes. With Carizma, my work got easier from the first day"

Desired Outcomes

Carizma manages the entire contract lifecycle – from first negotiations all the way to contract expiry many years later.

Further shorten timelines with electronic signatures.

"Shortening the contracting process is truly transformative. We can now act a quickly as a small organization"

Axicos AG, Carizma
Contract Lifecycle Management

axicos

Carizma – Complexity tamed

Feature-rich

- Integrated eSignature
- Template Management
