# 1. What is Quizzbotics?

Quizzbotics is a Multichoice Quizz Corrector API using an input photo of a predefined form with maximum 100 answers, each of it with maximum 4 choices powered by Artificial Intelligence and powerful cloud infrastructure.

## Target Audience

This API is meant for IT developers which are making apps to recognize answers manually written on a predefined form in a photo made with a scanner. Domains of using it: teachers, students, automotive, human resources, marketing etc.

## Automated Process

All processes are automated. You just have to follow the required rules for getting a high accuracy reading.

## Easy to Integrate in your APPS

We have multiple sample source codes presented on our website written in different programming languages which will help any developer to easy integrate the API in the APP(s).
