

Acculink™ Cargo

Asset Tracking & Monitoring Solution

ACCULINK™ CARGO

Key Benefits

- Obtain GPS-based, real-time location of your shipment or asset
- Set geofencing alerts to know if cargo or asset strays from authorized waypoints
- Detect whether a shipment is moving or stalled
- Gain critical real-time alerts and notifications
- Download reporting and data analytics for auditing and compliance verification
- Validate clear chain of custody and control
- Ensure cold-chain compliance

A Fully Managed Solution Delivering These Added Values:

- Real-Time Visibility
- Product Level Tracking
- Exception Based Monitoring

24/7 Security for Your High-Value Cargo

With Acculink, you can improve efficiency, eliminate delays and reduce operational costs while mitigating theft, loss and vandalism.

Acculink also allows you to precisely locate your product shipments in real time and validate their condition. This enables you to take quick and decisive action should you see a change in scheduling, or to prevent loss or theft.

Critical Environmental Monitoring

Acculink's high reliability sensors monitor critical environmental conditions including temperature, shock, vibration, light and humidity. This helps ensure that your cargo is not damaged or compromised and meets cold-chain compliance.

Key Use Cases

Freight & Cargo Tracking

Environmental Monitoring

Cold Chain Compliance

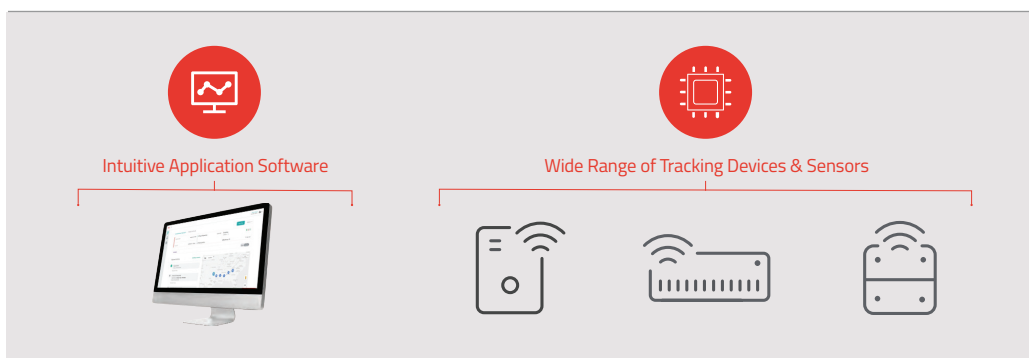

Acculink Cargo Key Features

Fully integrated managed service — Acculink cargo monitoring solutions are fully-integrated, end-to-end managed services that are fast and easy to deploy. The solution includes devices, network connectivity and application software.

Shipment monitoring — Gain supply chain visibility in real time, not just at milestone check-ins, for addressing quality, compliance and security. Validate that materials are secure with real-time alert notifications for intervention and prevention.

Product level tracking — Wide range of system sensors can track temperature, shock, vibration, light and humidity at the pallet/product level. This helps to validate product integrity.

Report automation — Receive reports based on continuously logged data captured from origin to delivery on environmental conditions and excursions that can be used for carrier performance evaluation and claims documentation.

APPLICATIONS

 <p>PHARMACEUTICALS Track and trace your shipments to ensure cold-chain integrity and compliance.</p>	 <p>ELECTRONICS Identify damage from shock and vibration and track if stolen or compromised.</p>	 <p>FOOD/PRODUCE Ensure your food shipments are kept chilled or frozen for spoilage mitigation.</p>	 <p>GENERAL CARGO Track and monitor your cargo to ensure brand protection and reduce theft.</p>
