

TRADETEQ CONNECT

Core trade distribution

Efficiently, securely, and transparently discover, buy, sell, and manage trade finance asset participations

Tradeteq Connect – the future of core trade distribution

Core trade risk distribution, such as LCs and guarantees used to be a highly manual, labour intensive, and often inefficient process.

Tradeteq Connect is the future of trade distribution: Agile, secure, core and cost efficient.

AGILE

Easily register online at **www.tradeteq.com** and create a user profile on Tradeteq Connect. Once approved, you can discover counterparties and trades. Manage your trade partners in your private address book.

SECURE

Tradeteq Connect runs on Microsoft Azure, the world's leading cloud platform. Tradeteq Connect gives customers the same security, privacy, and compliance protections that are used by global banks and 95% of Fortune 500 companies.

EFFICIENT

Tradeteq connect reduces the dependency on manual workflows and error-prone processes. An intuitive dashboard highlights the most important information. Automated notifications make sure you are fully in control of opportunities, events, and deadlines. And with full API integration you can continue to work in your familiar environment.

Connect, interact and transact

Trade faster, reduce costs, and expand your distribution capabilities

Tradeteq Connect provides a fully cloud-based core trade distribution solution that can be accessed via API or through an easy to use web interface. Advanced analytics, targeted reporting, and cashflow tools help to transform the entire trade finance distribution business.

- Join a global trade risk distribution network
- Distribute and buy core trade risk efficiently
- Replace existing manual workflows by digitising the related processes
- Eliminate errors and mistakes
- Maintain full compliance with legal, security, audit, and procedural frameworks
- Discover new distribution and asset opportunities

Transform and future-proof your trade finance risk distribution

Fully cloud-based platform

All Core Trade features, plus:

- Integrations
- APIs
- SSO
- Enterprise level support
- Global data residency
- Bespoke reporting

Tradeteq Connect – secure by design

Safeguarding and protecting customer data is paramount to Tradeteq. That's why Tradeteq Connect runs on Azure, Microsoft's industry leading, reliable, scalable, and highly secure cloud platform. Tradeteq takes advantage of the multi-layered security provided by Microsoft across physical data centres, infrastructure and operations.

The Azure cloud fully complies with the ISO27001 security standard, GDPR controls, and other global security, safety, and data protection requirements. Tradeteq Connect users fully own and control the collection, use, and distribution of their information and data.

Tradeteq's login and authentication services use the latest OpenID Connect standard. Core Trade Plus customers can, in addition, get access to Single Sign-On (SSO) integration.

Tradeteq Connect global data – local access

All Tradeteq Connect user data is stored safely and securely in Microsoft Azure Data Centres. Applications built on Azure take advantage of Microsoft's industry leading availability, disaster recovery, and backup features.

Core Trade Plus customers have the option to specify the individual region where their data will be stored. By storing data in their own dedicated 'Tradeteq Pod', located in one of 61 regions across the globe, Tradeteq Connect users can meet even the most demanding data residency, compliance, and resiliency requirements. Tradeteq Pods allow users to stay fully compliant with their country's or region's legal and regulatory requirements on location of their data.

ABOUT TRADETEQ

Tradeteq is based in London, UK and provides the global hub for trade finance distribution. Our end-to-end workflow, platform, and tools move banks and investors from fragmented and manual processes to automated distribution, reporting, and analytics.

Tradeteq is the official technology provider for the Trade Finance Distribution Initiative, an industry led effort of more than 30 leading global banks and financial institutions.
