3-DAY AZURE ARC WORKSHOP

Extend Azure services and management anywhere

WHY DO YOU NEED AZURE ARC

- Scale and automate hybrid cloud and multi-cloud management.
- Unify your environments with a consistent experience and familiar tools.
- Bring multilayered protection with built-in security capabilities to any infrastructure on-premises or other clouds.

EASY STEPS TO MAKE HYBRID-CLOUD SUCCESSFUL

- ✓ Enable Monitoring and Logging of workloads from a single tool
- ✓ Eliminate manual processes for IT team
- ✓ Leverage the same orchestrating and management toolset for infrastructure and applications across clouds and datacenters
- ✓ Get a cloud-like scaling experience on your own hardware

ABOUT AZURE ARC

Azure Arc product group is a bridge that extends the Azure platform to help build applications and services with the flexibility to run across data centers, at the edge, and in multi-cloud environments.

Azure Arc-enabled infrastructure brings cloud features for key resources like physical servers, virtual machines, and Kubernetes clusters. Azure Arc-Enabled services boost the hybrid infrastructure by bringing the power of Azure PaaS offerings like App Services, Data Services, and Machine Learning.

IN **3 days** YOU WILL GAIN

- Understanding of Azure Arc-Enabled Services (Data Services, Application Services, Machine Learning), its concepts, features, and pre-requisites
- Understanding of Azure Arc-Enabled Infrastructure (Servers, Kubernetes), its concepts, features, and pre-requisites
- Azure Arc enablement roadmap

Elastic scale

Unified management

Self-service provisioning

Automated backups
