

Protect your workers with the power of IoT

Aware360's SafetyAware software-as-a-service platform uses real-time data and live responders to protect at-risk employees anytime, anywhere. With an easy-to-use app, web-based control center, 24/7 guaranteed live response, and optional wearables, SafetyAware provides a simple, cost-effective way to keep workers safe and productive, while helping to ensure regulatory compliance.

Protect and save lives

Keep at-risk employees safe with real-time status data, 24/7 live support, and wearable devices.

Improve productivity and efficiency

Streamline operations and boost productivity with a simple, cost-effective solution that easily adjusts to current and future needs.

Stay secure and compliant

Safeguard sensitive data and comply with employee health and safety legislation more easily and efficiently.

Keeping workers connected and safe

“If we have a grass fire or emergency, we can identify the area and the other people within it. If someone’s injured, we can see who else is closest in the field. We can use employees as resources to help each other, and let them know the situation to make sure they can evacuate safely.”

— Lorinda Jacobson
HSE Coordinator,
Crescent Point Energy
