

Zensar's Hybrid Cloud Storage solution in Azure

ABOUT ZENSAR:

Zensar is a leading digital solutions and technology services company that specializes in partnering with global organizations across industries on their Digital Transformation journeys. Zensar has a global footprint and worldwide presence in US, Europe, Africa, and APAC with over 35 sales and delivery locations across industries.

See what customers are saying:

We are delighted to have Zensar as a trusted storage partner and advisor. Their Hybrid Cloud Storage solution enabled our long-awaited transition to hybrid multi-cloud to improve overall agility and control costs. Our infrastructure needs inverted from 40% compute and 60% storage to 80% compute and 20% storage, allowing us to take advantage of the OPEX model, DC footprint reduction (saving maintenance costs by 30%), and ensuring 99.999% data availability.

– CIO, Hitech Manufacturing firm

WHAT WE OFFER

Zensar Hybrid Cloud Storage-as-a-Service extends the on-prem storage estate consisting of Flash and HDD Arrays to cloud by hosting the hot data on premises and gradually moving cold data to Azure cloud storage. Thereby, it reduces maintaining unified access path to the data. Should the need arise, customer can avail of a 2-site DR solution using Azure Blob storage. The solution leverages the following Azure features along with pre-existing customer storage integration tools to provide a strategic hybrid cloud storage foundation -

- 1. Azure Disk Storage:** High performance, durable block storage for virtualized workloads.
- 2. Azure Blob Storage:** Massively scalable and secure object storage for storing unstructured data as well as backup and restore, disaster recovery, and archiving.
- 3. Azure Files:** Simple, secure and serverless enterprise-grade cloud NAS.
- 4. Azure NetApp Files:** Enterprise file storage for NetApp storage.

Zensar's Hybrid Cloud Storage is differentiated by its agility and the flexibility to work with any storage technology and any workload as per client needs.

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
