No-Code Smart
Application Builder

Solution Description

ChainSys No-Code Smart App Builder helps to build powerful mobile and web applications-customized to your business needs. Our interface allows you to drag and drop application components, connect them together and create mobile or web apps

Why Chainsys

- Allows for out-of-the-box integration with the existing database/application, an essential component for any solution you choose.
- Offers graphical, no-code, browser-based tools for the creation of layouts, approval workflows, rules, and dashboards- with changes made easily
- Reach more potential users with Cross-device support
- Deliver digital processes to the business 10x faster than using traditional development methods
- Fast and flexible deployment
- Continually improves your process

Chainsys Approach

The Chainsys Smart App Builder allows business users to create their own apps without having to rely on IT or consultants- making it easier to build software solutions

Included with a visual editor to build screens and navigation, and data integration adaptors for all your existing third-party tools, and comprehensive training resources to get you started readily.

ChainSys Smart App Builder also supports single sign on, so your business users can quickly adopt this application to improve the process.
