

Beyond Managed Kubernetes

The best way to run cloud native applications anywhere

By 2020 more than 50% of global enterprises will be running containerized applications in production to enable huge improvements in business agility, developer productivity, scalability, availability and cost savings.

Giant Swarm provides an always up-to-date cloud native platform plus 24/7 operations to run your containerized applications securely, reliably in production at scale, both on-premises and in the cloud.

Why Enterprises Love Giant Swarm

Enhanced Security

- Hard Multi-Tenancy
- Role Based Access Control
- Pod Security and Advanced Network Policies
- Pen-Tested by Fortune 500

High Availability

- Daily Zero Touch Updates
- Proactive Troubleshooting
- 24/7 Operations with Exceptional Support
- Survived Hype-Sales with 300.000 RPS

Hybrid Cloud Scalability

- Certified Kubernetes Platform
- Vanilla Kubernetes Anywhere
- High Degree of Automation via Operators
- AWS and Microsoft Azure Partner
