

APPSURIFY TESTBRAIN

SMARTER SOFTWARE TESTING

APPSURIFY TESTBRAIN

Appsurify was built to give back Time and Resources to Software Development Teams struggling with Automation Testing

The only product on the market that enhances existing test practices with Intelligence.

FLAKY FAILURES

TestBrain can determine which tests are Flaky and automatically quarantine them, so they don't break builds.

AUTOMATION TEST TIMES

Reduce your automation test-suite completion times by over 95% and get feedback immediately.

ADVANCED REPORTING

Automates the defect lifecycle, opening, tracking, and closing bugs for you.

Automatic Reports showcasing which tests failed why, when, and how.

LEVERAGE MACHINE LEARNING

TestBrain leverages Machine Learning to determine the areas of an application that have changed after each developer commit, and only runs the subset of automation tests associated with those changes.

30% MORE TEAM PRODUCTIVITY

TestBrain can help reduce the burden on the Developers trying to ship more confidently, and Quality Assurance teams in choosing either speed or quality for application testing.
