# Handshakes App

A brief introduction

Discovering connections between persons and entities,

while important for corporate due diligence, was an inefficient manual task. As the amount of data grows, so do the challenges of discovering meaningful insights – especially within reasonable timeframes.

To solve these challenges, our founders set out to design a solution that combines reliable data with adaptive technologies – enabling greater market transparency and faster risk detection.
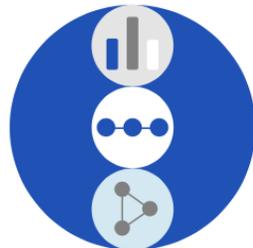

The result? Our award-winning **Handshakes App**.

Reliable data + connection maps = a one-of-a-kind due diligence tool

Reliable data

You can trust our data, which is provided by official company registries and capital markets. Markets covered include Singapore, Malaysia, Vietnam, China and Hong Kong.

Connection maps

What used to be an impossibly laborious, manual process of drawing connections can now be done instantly, thanks to our connection maps. They have proven to be gamechangers for our government and private sector clients.

Customised to your needs.

1

Prepaid subscriptions

Have a big due diligence project coming up? We have prepaid subscription plans that will help you get through the length of the project with greater ease.

2

Annual subscriptions

Is your organisation onboarding new vendors every other week? Or do you offer due diligence checks as a service? You'll need a investigative tool to enable your team in performing quick, effective checks. The more cost-efficient solution is an annual subscription.

3

RESTful APIs

Our APIs are available for purchase, should you prefer to secure our data for your own platform. Choose from our standard APIs, or let us customise an output that suits your systems and workflows.

4

Custom insights, done for you

Need help with a complex and urgent project? Leverage our team of experts, who are trained to navigate our datasets and analytics tools to the fullest – and they'll deliver the insights you need, just the way you need it.

Handshakes

Konstantin
Product Manager, Arachnys

" Our clients' KYC, AML and client onboarding processes were manual and complex. Handshakes' data and analytics features allowed us to finally automate corporate data collection from primary sources.

ARACHNYS

Ben Charoenwong

Assistant Professor, National University of Singapore

" My research studies common ownership in Singapore procurement auctions and needed bulk data pulls on many customised variables. Handshakes provided a complete and error-free dataset with helpful and timely support.

Handshakes

Trusted by the public sector and corporations.

Private industries, the public sector, financial services and regulatory bodies trust Handshakes with their data and workflows.
