AiTat is highly quality conscious in its selection process and is particular about choosing the most talented and culturally sensitive resources.

AiTat is the go-to consulting service for the need of senior resources within the Telecom sector . AiTat helps clients make the right decisions quickly and confidently. With its experts having extensive knowledge in Telecom & IT Infrastructure who apply Artificial Intelligence algorithms in every aspect help the clients with cost and risk analysis. Through this approach we can identify potential cost drivers.

Our Key strengths you can count on:

- Access to a huge market through large partner network in India
- Efficient and thorough recruitment process of experienced resources
- Candidates are handpicked based on customer need, with high precision
- Technical sales team with good understanding of client requirements

Our expertise resides in end-to-end consulting for full-life cycle implementation of various IT solutions, and comprehensive post-implementation maintenance.

Our employees and subcontractors have an average of 3 to 15 years experience. We have the best personnel on our team increased skill and knowledge of industry best business practices.

We treat people as our highest priority, so when we ask them to adapt a new process, and we ensure they have a clear understanding of the process that is being rolled out. This is only achievable because all key personnel, including the Client Relationship Manager are proven experts themselves, and have the skills to identify right resource based on the customer need.
