

WHY E-INSPECTOR?

DISCOVERY AND INVENTORY

Find sensitive information by file content, metadata, and more

- Business-driven, efficient, and dynamic inventory
- Discover sensitive files by information type
- ISO, GDPR, and SOX compliant

GRANULARITY

Discover and protect multiple files based on specific data attributes

- Scan by multiple filters such as location, type of information, users, and much more
- **Apply Information Protection** with flexible, information-driven, strong policies

OPTIMIZATION

Dynamically apply file lifecycle actions

- Bulk copy, move, and delete actions for files, based on multiple parameters
- Manage owners, change file permissions, and apply or remove encryption to files

Set Inspection Resources

Select a single server, multiple servers, a cluster, or multiple clusters

Findings, Recommendations, and Monitoring

Optimized operationalized actions

File Lifecycle

- and risk mitigation
 - Delete: compliance / security risk

Set Inspection Scope

Multiple locations cloud and on-premises

- File relocation: optimization, security - Copy: for review

Set Inspection Criteria

Multiple criteria, location, content, metadata

Information Protection

Apply Information Protection by label, by policy, and more. Support for customized permissions

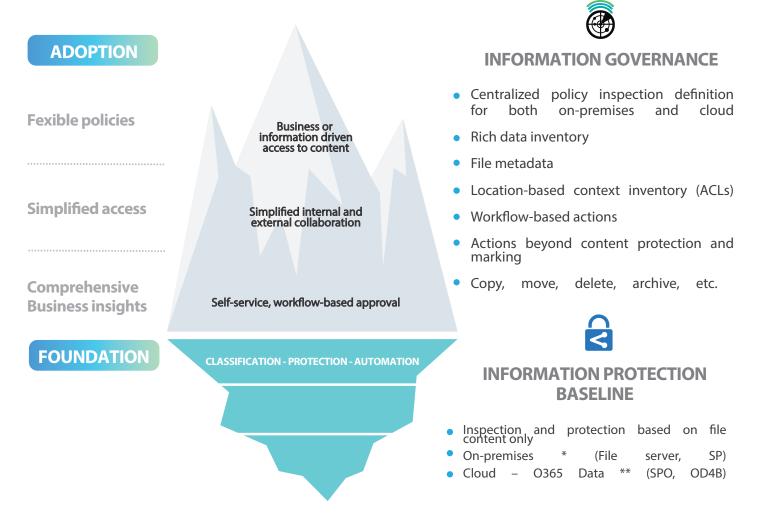

Reporting & Analitycs

Discover sensitive data, set parameters and customization

E-INSPECTOR IMPLEMENTATION

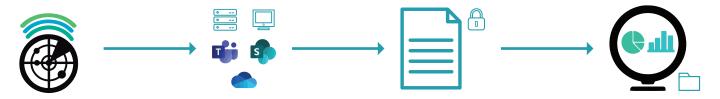

SOME OF CHALLENGES SOLVED BY E-INSPECTOR

- ldentify what type of data (e.g., credit card numbers, personal data, etc.), where it is stored and who is accessing it
- Q Understand the types of information stored in specific repositories (SPO, Teams, OD4B, On-Prem, etc.)
- $\overline{\mathbb{Q}}$ Migrate files to the cloud excluding specific data
- Change document permissions when the user is no longer part of the organization
- Encrypt files by data type, department, users and specific location

DAY-TO-DAY SCENARIOS

ENCRYPT SENSITIVE INFORMATION

E-inspector scans across multiple servers, repositories and folders Find and encrypt documents with sensitive information.
Fastest automated scanning and encryption on the market

Dynamic multilevel **inventory** including the encrypted files

CHANGE FILE OWNERS

E-Inspector scans across multiple servers, repositories and folders Find and change **file ownership** without removing the encryption from them

Dynamic multilevel **inventory** including the changed ownership of files

RELOCATE FILES

E-Inspector scans across multiple servers, repositories and folders

Find and move files based on specific filters such as user, location, content, etc., without removing file encryption Dynamic multilevel **inventory** including the changed ownership of files
