Industry
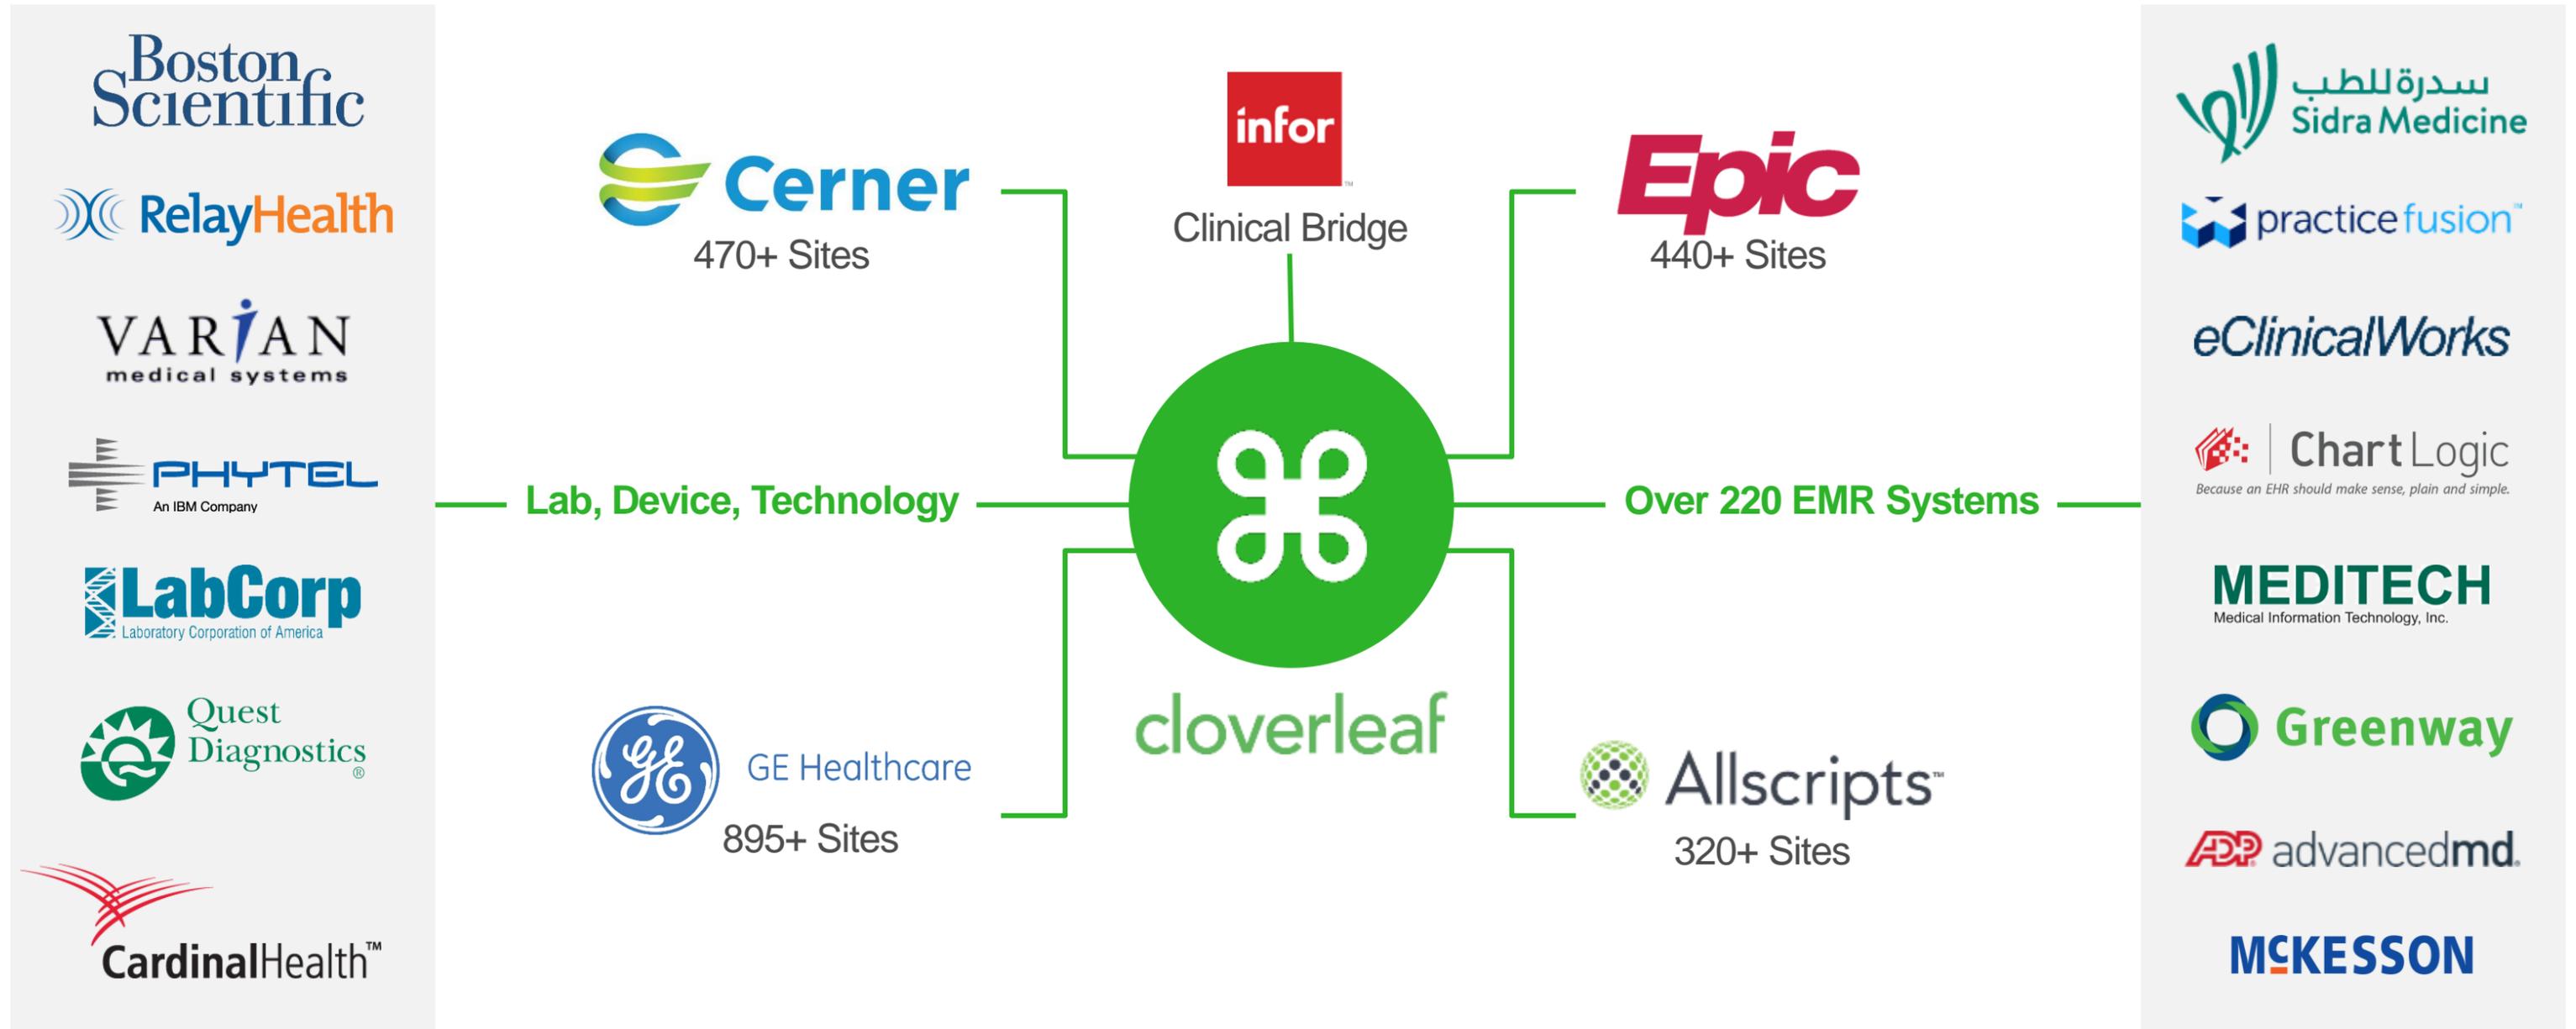

Scalable and Reliable

- Cloverleaf deployment at major US IDN manages **70,000+ connections** and processes **+300 million transactions every day**

- Hospital processing an average of **660 million patient messages every 30 days** experienced **ZERO** lost messages

- Major IDN monitoring **17 sites simultaneously** from a single global monitor console within their Network Operations Center

- Hospital had Cloverleaf highly available for over **8 years** before having to stop and restart…and the stop/start was due to a hardware failure
