

Power Portal

Quickly and Securely Share Power BI Dashboards

Your business-changing insights, now instantly shareable.

Provide reports to external clients, give stakeholders crucial information, and collaborate internally without the hassle of multiple files.

No technical expertise required

Intuitive, user-friendly interface lets you send reports in seconds.

Rock-solid security

Files stored securely in the data center geolocation of your choice.

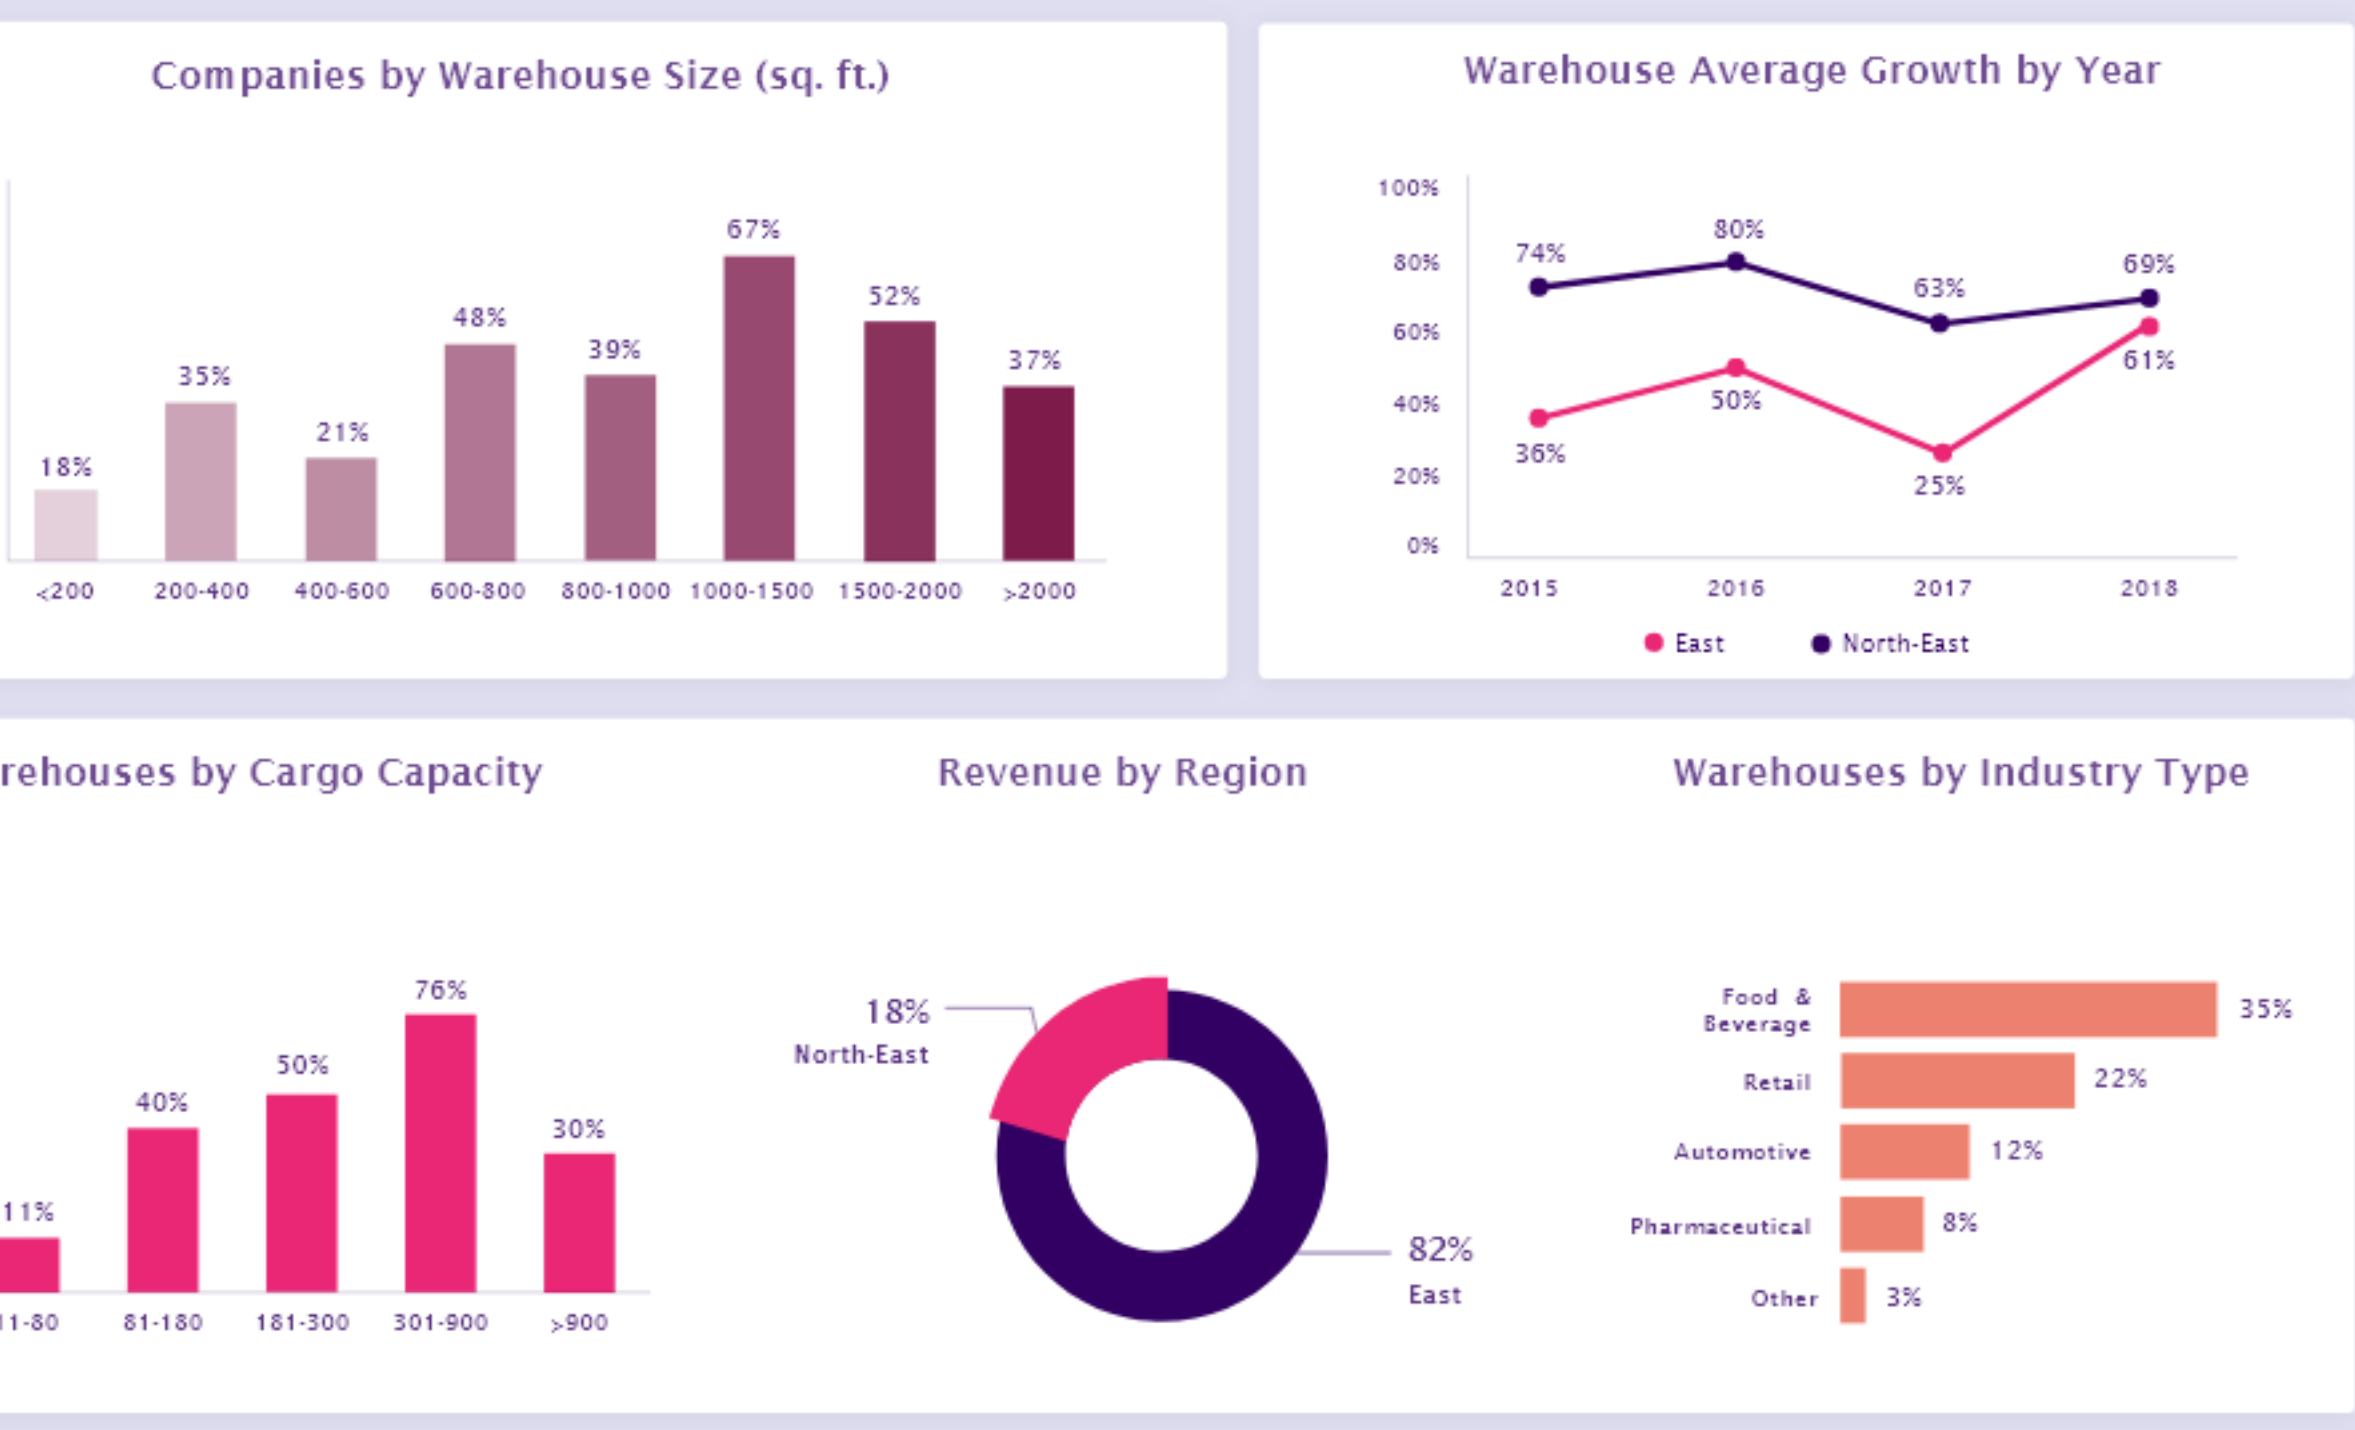

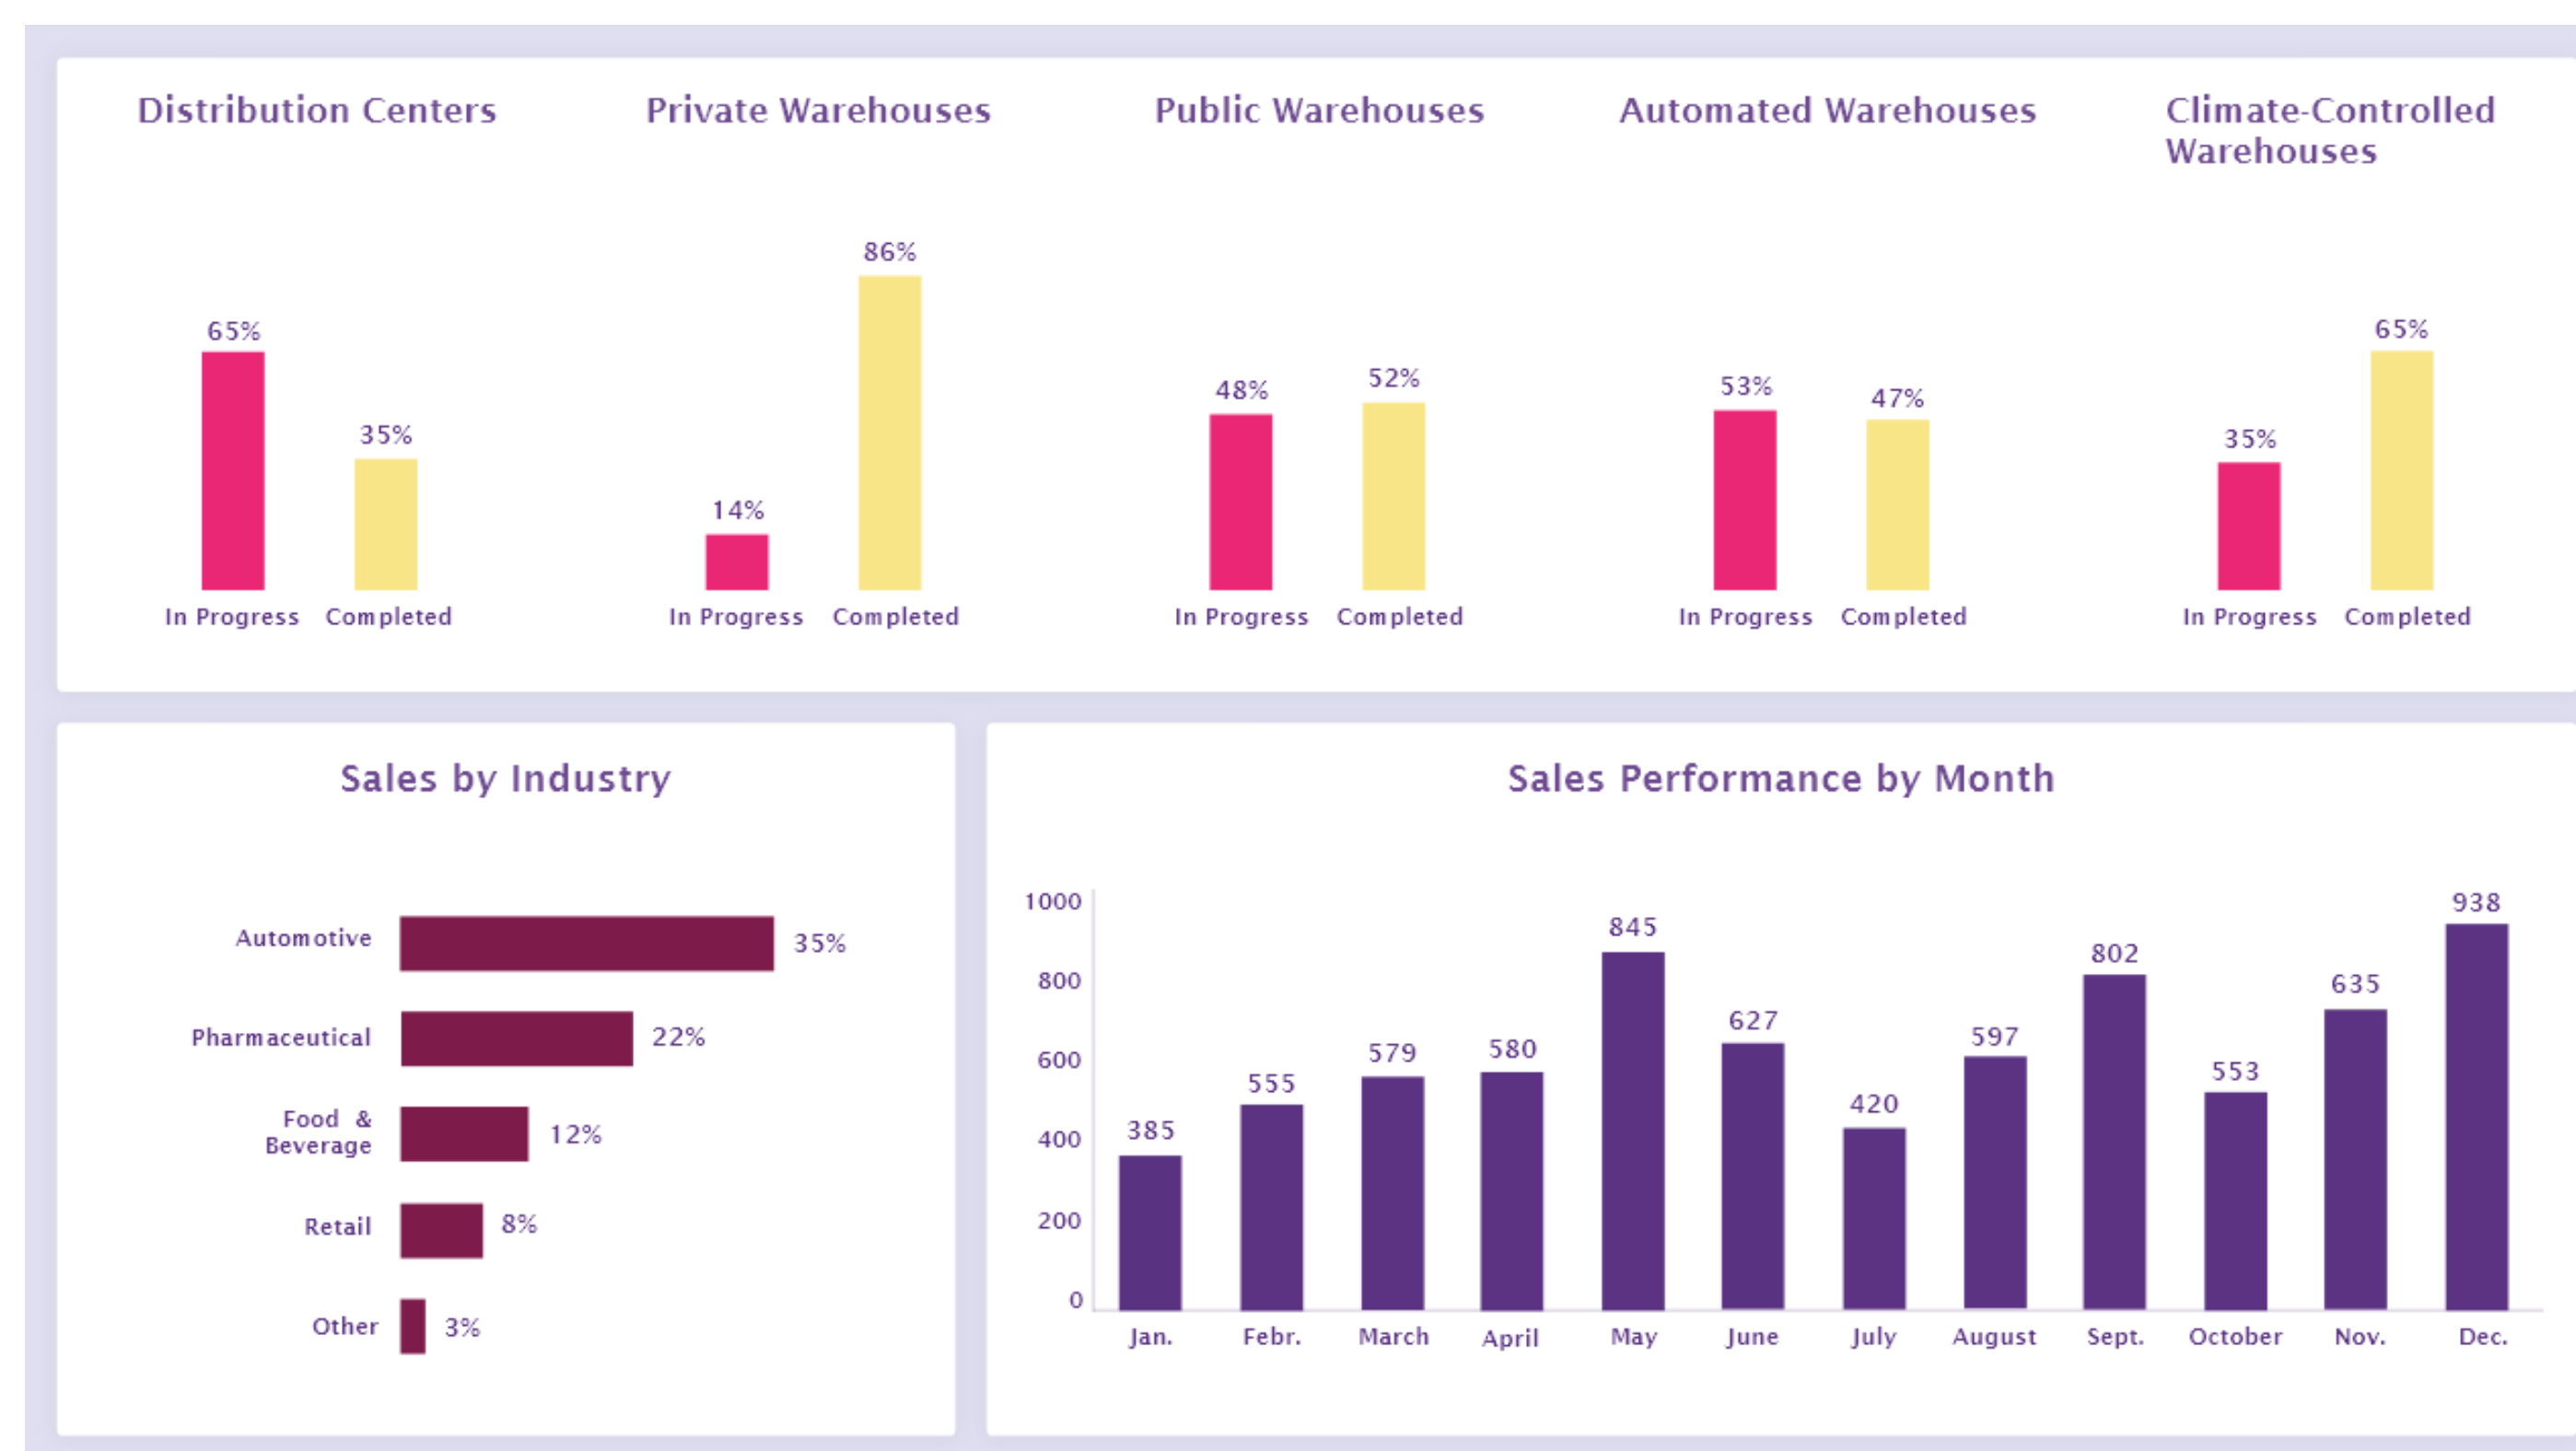

Easily manage users

Set granular permission levels for workspaces, roles, and report access.

Accessible at the office and on-the-go.

Senders and recipients can easily view reports in desktop or mobile app via secure one-click login. View report-level analytics, monitor usage, and share real-time data insights.

Collaboration, simplified.

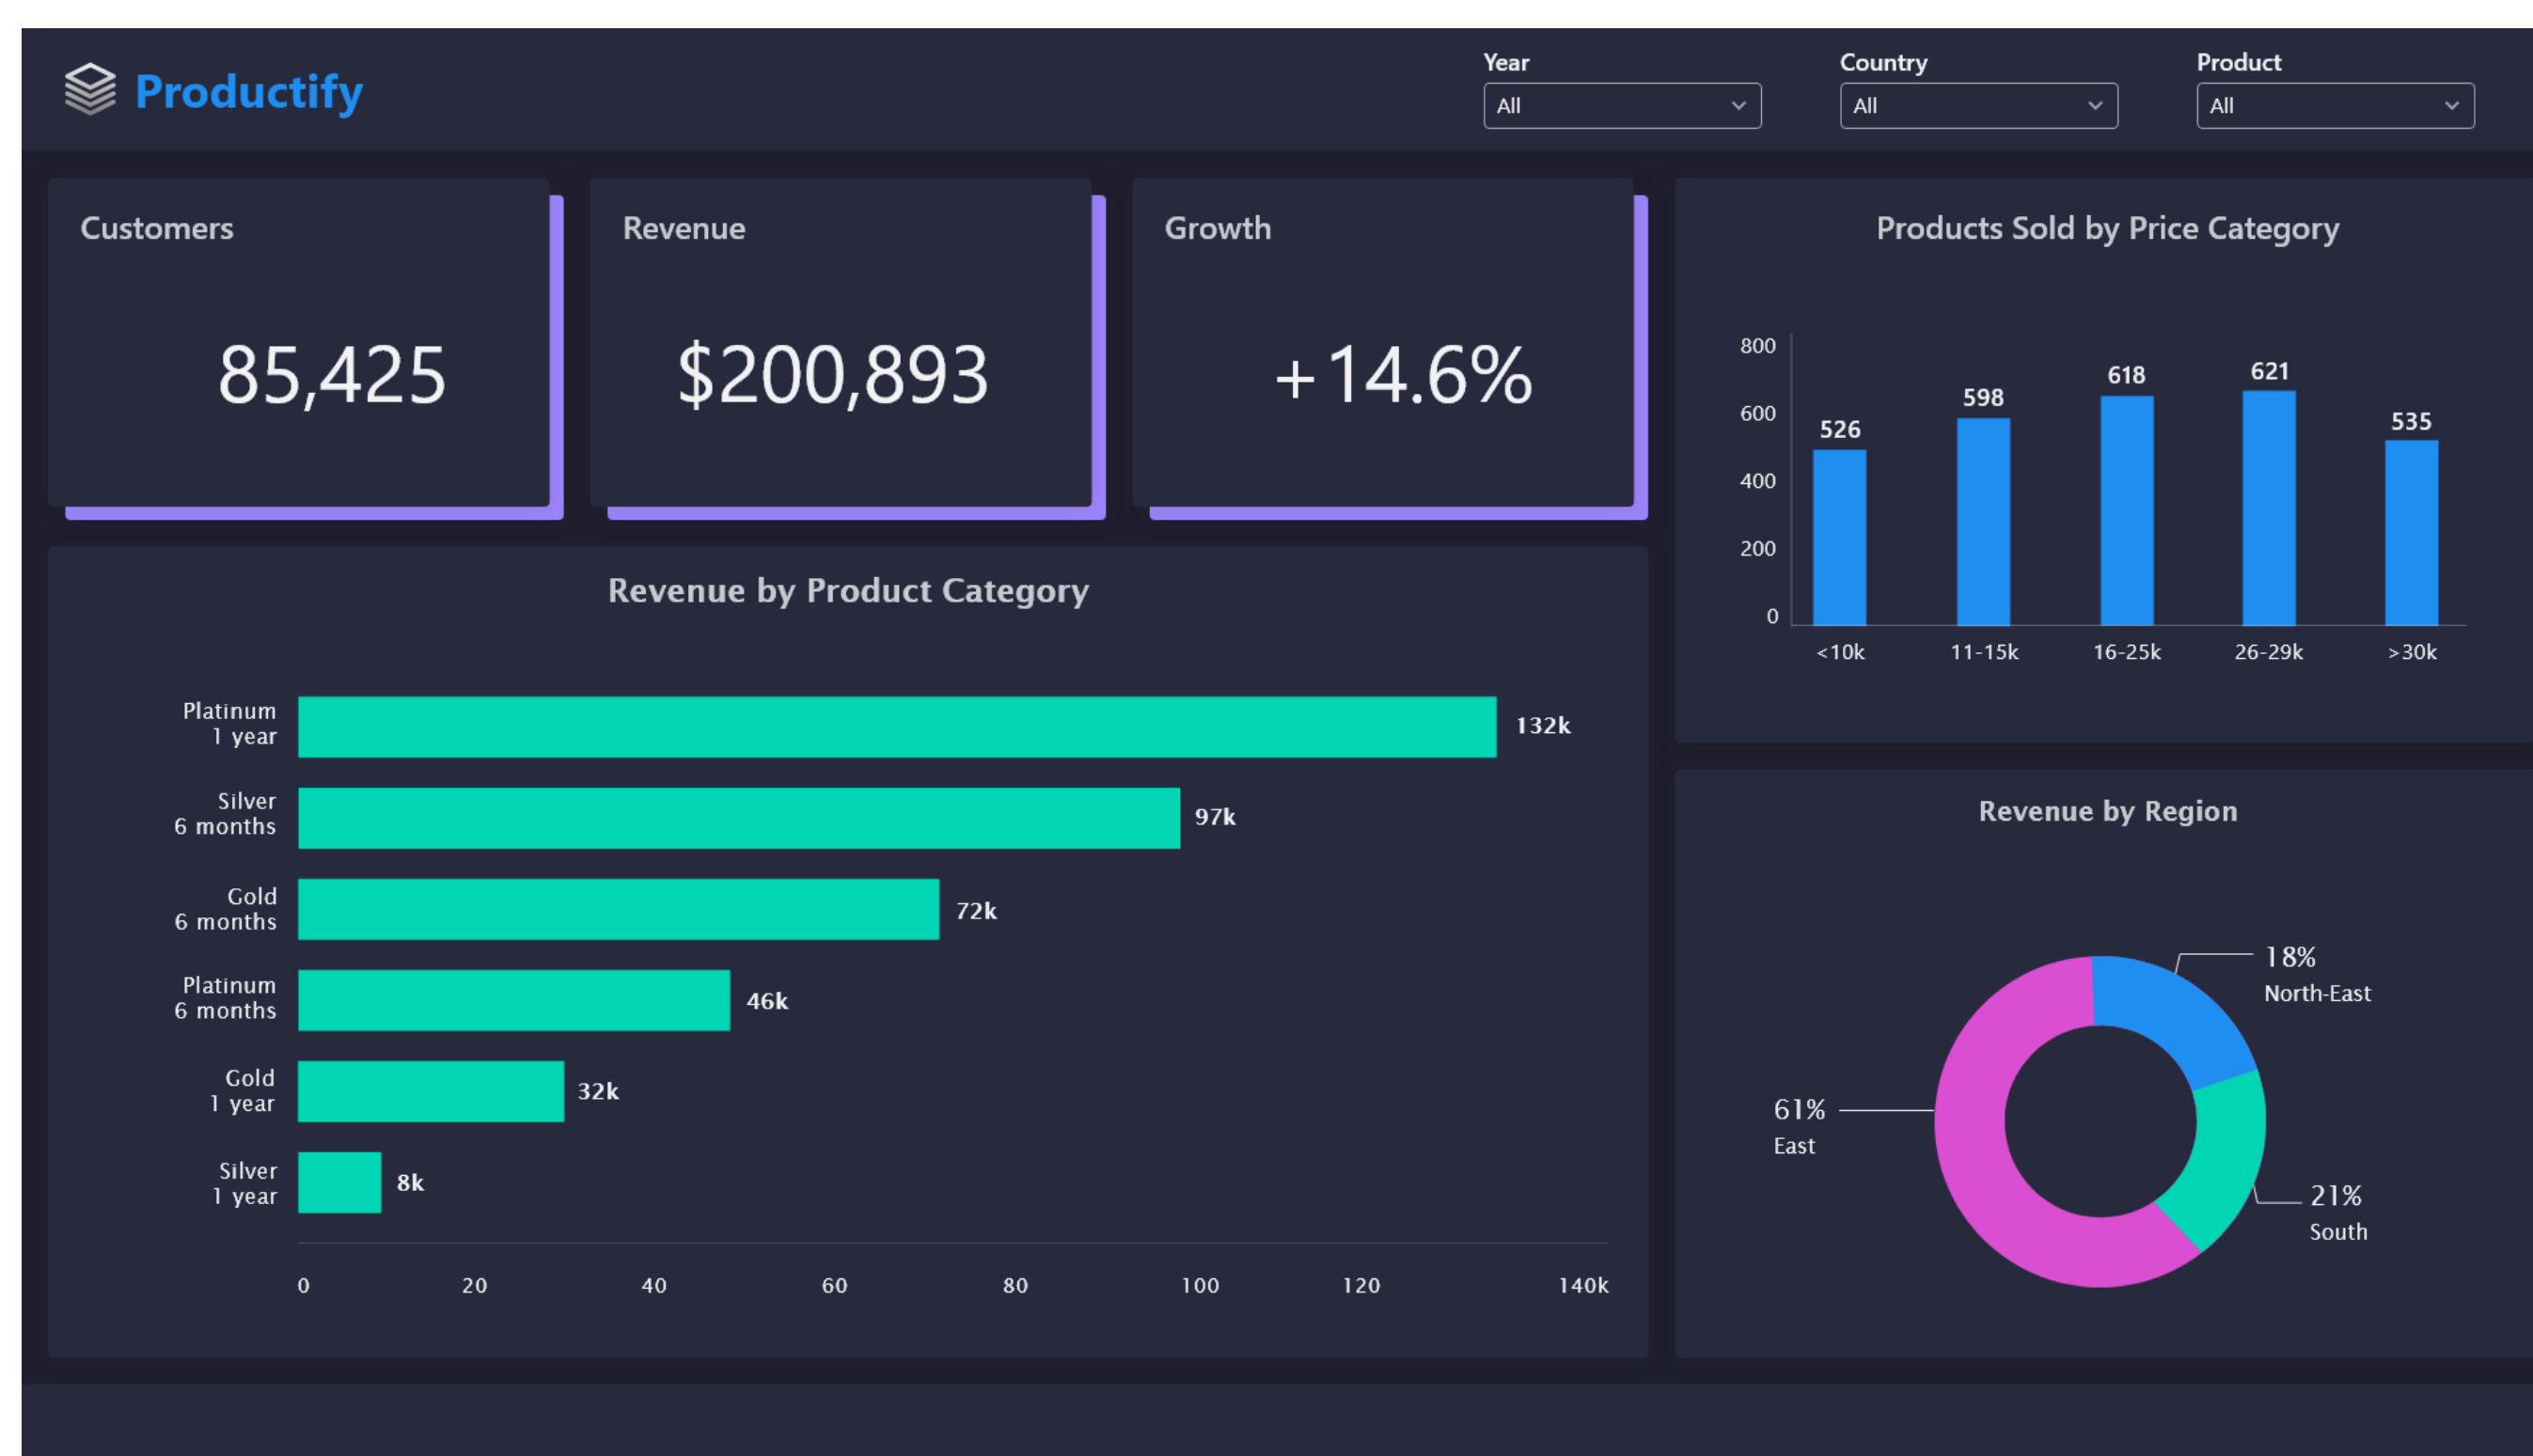

Team members can collaborate on reports directly in the browser, or download and edit in Power BI desktop.

Version control allows you to switch back to previous versions anytime.

No more juggling multiple files.

Customize to your brand.

Match the portal's look and feel to your organization's identity, from colors to font to graphics and more.
