SGA TI em Nuvem

Cloud Consulting for investment Optimization

sga

Scope: All Segments / Industries

SGA

Challenges

Would you like to monitor your azure environment on a daily basis? Is it important to keep a compliance management, comparing planned budget with the actual cost? SGA provides a monitoring tool for azure platform; exclusive dashboards allows fast problem identifications at the environment and tracking other resources usages for a better sizing.

"We get the amount of Core's, memory, disk space and see if what we reserve and allocate for our services is really what we operate. This we monitor and monitor, even for the need of our own business. "- Manuel Landeiro, IT Superintendent of Patrus Transportes

Solution Objective

The Solution allows:
. Management and Monitoring Costs on Azure, . Identify potential for investment optimization, . Present trimestral reports with best practices regarding security, performance and costs.

"The technology upgrade in the environment has improved the technologies used internally, we have also improved the security of information using Azure and with recommendations analysis performed by SGA Intelligent Technology's managed service that informs us in real time the health of the environment and the experience of the environment. end user. "- Thiago Souza, IT Analyst at Jaguar Mining Inc.

Benefits

• Complete monitoring; • Plaint sight management; • Enlargement of efficiency; • Rapid provisioning; • Centered management; • All as a service; • Intelligent services; • Tranquility and safety.

"Within the project's financial study and understanding all the particulars of the environment, the cloud solution provided us with the opportunity to gain a NPV study of close to 30% compared to the on premises design. We can already reap this from financial follow-ups along with the SGA monitoring tool. - Thiago Alvarenga, IT Manager at Precon Engenharia.

Trusted Cloud Advisor for Cost Optimization

| Monitoring	Billing Management	Advisor - Report Trimestral	Governance
The SMFC is the first platform in Brazil that manages cloud 100% focused on Azure. It displays clearly the current consumption and the planned consumption of the year. Based on its information, the percentage of economy, compared to the previous year percentage. Furthermore, is the only one that presents the budget available for cloud consumption.	. Detect sub-utilized resources to reduce cloud consumption therefore billing value. . Monitor public cloud consumption, alerting the client about any changes that might affect the costs for the following months.	. Trimestral reports with best practices regarding security, performance and costs.	. Day by day management focused on transforming IT team in an innovation catalyzer focused at the business . Clear vision of an action Plan in cases of critical stops, disasters or related situations

---

"With system migrations, the investment was growing, and for that, I needed a portal to monitor this investment, how much I'm spending if it's worth it. SGA Smart Technology has provided a portal to track this investment. Now I know the cost of the machine, the cost of the service and how much I spent last month. And with that, knowing how much the cloud is giving me flexibility as well as the budget investment. "- Danilo Neves, IT manager of Cofermeta.

Cloud Consulting for investment Optimization

The SMFC is the first platform in Brazil that manages cloud 100% focused on Azure.

Solution Alignment

Smart cloud as a tool to Digital Transformation of Datacenters

.We act as a business partner , supporting in its process of digital transformationof the enterprise through technology. • We support the diagnosis realization and provide the strategy to implement a new cloud datacenter, on a scalable process. • After the implementation, we offer backing on the environment's support for it to maintainitself healthy and available to be used.

Advanced Partner Support - ASFP

The SGA has an advanced support level that only 40 of Microsoft Partners in Brazil have. Also, direct access to senior level Engineers; one of the fastestcostumer support, with 1, 2 and 4 hours for categorized SLA as A, B e C; Named Services Manager; Roadmap access of the products before market display; Exclusive workshops for the Engineering team of SGA; exclusive partner trainings; Cloud architect to support in projects drawings.

Management

SGA provides a monitoring tool for azure platform; exclusive dashboards allows fast problem identifications at the environment and tracking other resources usages for a better sizing.

The Solution allows:

. Management and Monitoring Costs on Azure, . Identify potential for investment optimization, . Present trimestral reports with best practices regarding security, performance and costs.
