

OCR by Primesoft (Optical Character Recognition)

In each company, about 40% of office workers encounter the need to rewrite documents more than once a week. Every year, the storage problem grows, but more importantly, it takes a long time to search for data. The answer to this problem is OCR - a solution increasingly used in modern companies - in various spheres of business. Its become an element facilitating everyday work in offices, companies or secretariats.

OCR solution automates the process of document registration. The functionality speeds up the process of entering data about a document by analyzing its scanned image and supplementing the value of the reading field describing the document. The registration process takes place with a small effort and cost, eliminating the tedious rewriting and the possibility of entering incorrect data.

- **Shortening the scanning process of documents**
- **Automatic data transfer to external systems, e.g. ERP, DMS, CRM**
- **No cost of infrastructure – SaaS model**
- **Reducing of costs and elimination of errors related to manual data entry**
- **Reducing the time of data entry and elimination of delays associated with it**
- **Full-text search**

OCR pays off:

The use of OCR is important when introducing paper versions of the following documents into the system or registering them from the mailbox or phone:

- Invoices
- Insurance policies
- Vehicle registration documents
- Receipts
- Traffic tickets
- ... many other
- **Fast access to information**
- **Guarantee of compatibility with the database**
- **Pay as you go**

„Implementation of OCR technology and integration with the ERP system resulted in a reduction in document handling time and administrative costs as well as optimization of processes related to purchases and settlements”

Anton Sotrel, Member of the Board, ALPLA

„We hereby confirm the use of the mobile application in the field of automatic data acquisition from vehicle registration documents and European Traffic Tickets using OCR technology by Primesoft Polska.”

Irena Szymańska, Director of Customer Service Department, EFL, Credit Agricole Group
