

Customer Success Story

Europejski Fundusz Leasingowy

Company specializing in leasing and loans for companies, operating since 1991.

The development of intelligent OCR technology gives a wide range of possibilities for its use also in mobile solutions, as well as for reading various types of documents. Europejski Fundusz Leasingowy has introduced this service in its organization to recognize data from vehicle registration documents and European traffic tickets. The benefits of automating this area are primarily the saving of time and effort.

EFL company deployed OCR on Azure Virtual Machines. EFL received OCR system by Primesoft Polska using Azure Software-as-a-Service - no cost of infrastructure.

Win Results

- Optimization process of obtaining data from documents
- Reduction costs
- Mistakes elimination
- Reducing time of entering data
- Increased work efficiency
- Fast access to information
