Zensar's Database Migration Solution in Azure

Zensar is a leading digital solutions and technology services company that specializes in partnering with global organizations across industries on their Digital Transformation journeys. Zensar has a global footprint and worldwide presence in US, Europe, Africa, and APAC with over 35 sales and delivery locations across industries.

WHAT WE OFFER

Zensar's Database migration solution is comprehensive database migration strategy to migrate Any database whether it's on cloud or on-prem to Azure. It assesses the information environment, ensures data quality, constantly validates and tests with end-users. The solution leverages the following Azure features along with Oracle GoldenGate to provide an agile, end-to-end Database migration strategy -

1. **Azure Database Migration Service:** Tool that simplifies, guides, and automates database migration to Azure.
2. **Azure Hyperscale:** High performance Azure SQL database that can scale up to 100TB.
3. **Azure Data Factory:** ETL tool to migrate data to Azure SQL. Integrates with SSIS.
4. **Azure Files:** To create a file share in the cloud.
5. **Azure SQL/PostgreSQL/MySQL/CosmosDB Server:** Running as standalone IaaS or PaaS managed services with elastic pools.
6. **Azure Bacpac:** A BACPAC file is a ZIP containing the metadata and database data which is stored in either Azure Blob storage or local storage and later imported back into Azure SQL VM, Azure SQL Managed Instance, or SQL Server instance.

Zensar's Database Migration is differentiated by its agility and the flexibility to work with any database vendor technology and any workload as per client needs.

See what customers are saying:

"We are delighted to have Zensar as a trusted Data partner and advisor. We decided to migrate our applications and databases to cloud to Azure for greater scalability, security, and manageability. The team worked closely with us and used the best practices and industry standards in the implementation and execution phases. Today, we find it much easier to share the latest information, enable cross-border collaboration, and work toward better healthcare for all."

— CIO, Public Healthcare Organization

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
