

When you want the enterprise security of on-premise, but you want the flexibility of Cloud, Catch Cloud is a New Zealand government approved hosting solution powered by Microsoft Azure.

Catch Software has used its Microsoft Gold Cloud Partner and Atlassian Platinum Partner skills to develop a highly available, extremely responsive PaaS model designed for DevOps and tools in the wider business productivity space. With Catch Cloud you can unify and transform the management of your complete toolchain, abstracting away the hosting and integration of these tools in the cloud.

Select from:

- Atlassian products (e.g. Jira, Confluence, Bamboo, Bitbucket)
- Catch Application tool chains
- Azure tool chains
- 3rd Party Apps

And let Catch Cloud do the rest!

Applications

In addition to the popular selection of 3rd party solutions integrated through Catch Cloud, we also provide a host of Catch-developed tools:

- Enterprise Tester
- Smart Map
- Visual Map
- Smart Planner
- Just Test
- Catch Hub

Flexibility

With Catch Cloud, it doesn't matter how these solutions are typically hosted, you choose how you'd like it, and Catch Cloud can deliver as such:

- Single/Multi Tenancy
- NZ Government restricted data approved solution
- PCI DSS Capable

Security

Through Catch Cloud, you can select and apply across your toolchain:

- Network Controls
- Data Encryption
- Security Operations
- Disaster Recovery
- 24/7 Monitoring
- Availability SLA
- Enterprise Class Backups

- Multiple Environments

Selectable to your risk profile, Catch Cloud can further provide additional enhanced security features including:

- Advanced encryption using TLS 1.2
- BYOK
- Geographic and IP restriction
- Log storage based on needs
- User Access Control
- Custom URL
- 3rd Party Security Assessment approved by Catch

Customers around the world trust Catch Cloud to be their source of toolchain, including S&P 500 and Government agencies & departments. Reduce your TCO now and remove the worry of managing your toolchain infrastructure with Catch Cloud.

Catch also provides a range of value-added services including:

- Configuration and setting of tool chains, applications and infrastructure
- Practice Management
- Upskill and training on practices and tool chains
- Migration from 3rd party to Atlassian or Azure stack
- Application Management / Managed Service
- Capability as a Service (CaaS)
- Customisable offerings for Managed Support and SLA options
