

Smart Package Room™

Package Management Just got a lot Easier

When a package is placed inside, the Smart Package Room knows exactly where it is, what time it was put there, if it was dropped or moved, who picked it up and when. It's a lot like magic but it's born from technology.

What is the Smart Package Room?

The Smart Package Room is a cutting-edge solution that improves delivery efficiency for couriers and puts the control of package pickup back into your residents' hands. It can be added to new or existing rooms, providing scalability to accommodate ever increasing package deliveries. It's Intuitive, cost effective, and virtually management free. All interactions are monitored and logged 24/7.

Why customers use the Smart Package Room?

- Time Efficiency
- Scalability
- Secure

Efficient Use of Time

- Easy Integration with the Resident Database
- No staff required
- User friendly Interface

Secure and Affordable

- All interactions are monitored and logged 24/7
- Cheaper than the next best solution
- The company's unique Amoeba CV™ technology tracks packages.

Staff can go back to bringing the company profit

Don't have to retrofit a building to use the solution

High ROI with secure package management

As the Property Manager of a large luxury apartment community with a busy demographic of working professionals who order everything online from their toilet paper to their furniture, I cannot express how greatly the Smart Package Room has helped give us the time back to do our jobs. Myself and the two leasing consultants were spending more than 4 hours per day trying to manage the daily packages.. The minimal staff time that this amenity requires helps us to be more proactive and less stressed!

Erica Stockton, Property Manager, Corcoran Management
