Meetings

Ondato: Secure Remote Meetings

ondato

The feature that lets you organize effective internal meetings with confidence

Security

- Additional user authentication levels
- Multiple authentication credentials supported
- Advanced certified technologies
- Protection from vulnerabilities

Efficiency

- Effortless meeting organizing and set-up
- Cross-device functionality
- Compatible with most videoconferencing platforms
- Translation of processes into any language
- Supports all major browsers and devices
- No additional integration or IT resources needed

Confidentiality

- Designated attendees and guests
- Complete privacy and confidentiality
- No background monitoring
- User authentication in under 60 seconds

Using a wide range of advanced technological tools, Secure Remote Meetings are designed to guarantee that only designated individuals can access the virtual meeting room through trusted authentication methods.

Virtual conferences are regularly exposed to cybercriminals and sensitive information leaks

ondato

Emerging Challenge

Remote communication faces a number of security threats due to lack of reliable user authentication tools.

Top-level communication requires top-level security measures that also allow for a seamless user experience.

Our Solution

Secure authentication method that ensures protected remote meetings, conferences or events from unwanted intruders.

Secure access methods include:

- E-signature authentication
- Biometric identification
- Video call identification with human experts

Guaranteed Outcome

Being confident about the privacy and confidentiality of your meetings, conferences or events.

Take full control of your virtual meetings by designating the guests and keeping your internal information secure.

Ondato Secure Remote Meetings + Microsoft Teams

ondato

As organizations are increasingly sharing their internal information remotely, it has become essential to establish extra layers of security that would protect their privacy and deliver a sense of confidentiality. That is why Microsoft and Ondato have teamed up to develop the perfect solution for the way we communicate - the Secure Remote Meetings feature.

Secure Remote Meetings feature with Microsoft Teams gives you:

Maximum Security	Fast and Simple Use	Trusted Environment
The reliable method to organize virtual meetings	Hassle-free processes that save both time and money	A safe space for internal information sharing

Case Study: Parliament of the Republic of Lithuania

ondato

LIETUVOS RESPUBLIKOS
SEIMAS

"Particularly complex and sensitive decisions on authentication, voting and other subtleties of the Parliament proceedings were quickly implemented. The virtual Parliament hall has become a convenient and effective tool, by improving which the Lithuanian Parliament will be able to ensure the continuity of legislation in Lithuania."

- Viktorija Čmilytė-Nielsen,
the Speaker of the Parliament

Achieved Outcome

Simple and effective use

Guaranteed member privacy and confidentiality

Effortless implementation process
