The struggle with  
**Papers, Excel sheets & Sticky notes**  
stops now

By digitally empowering the employees, we enable a smooth shift from paper to digital for real-time visibility and reporting, reliability, safety and retrievability of checklist data.

Industry **CHALLENGES** e-Checklist takes head-on :

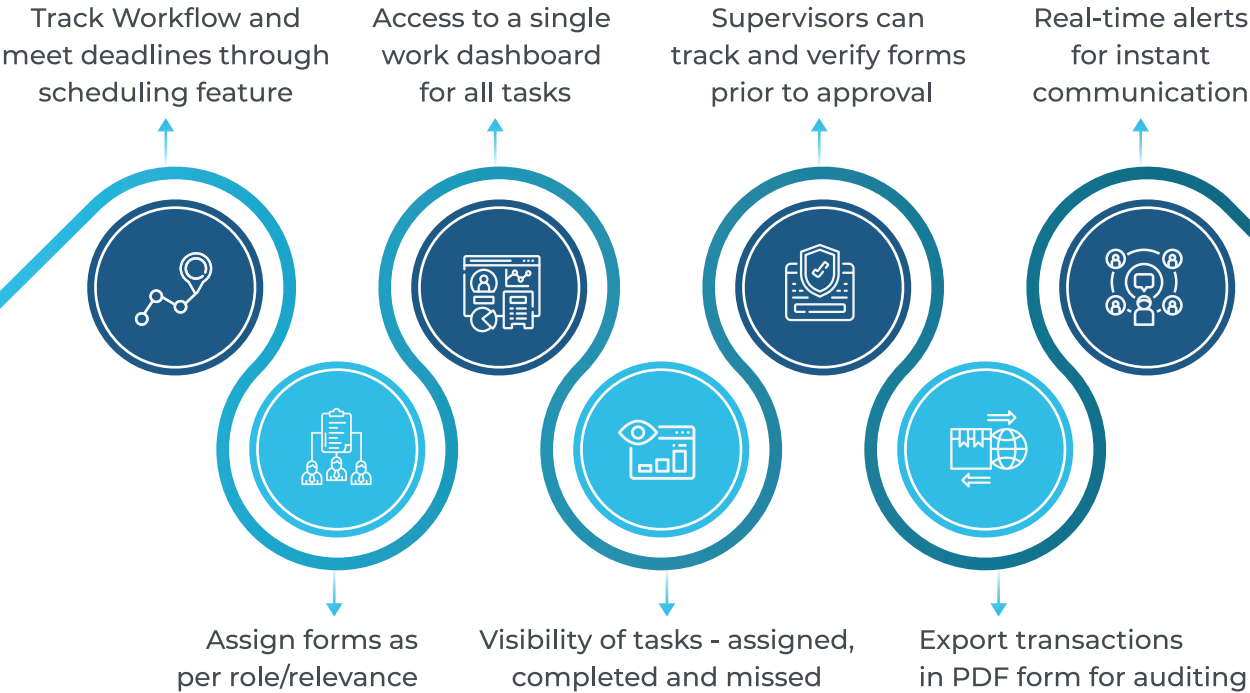

- Paper-based checklist and forms
- Difficult data retrieval
- High storage cost
- Possibility of human error and data tampering
- Difficult to carry the documents
- Timely analytics not possible due to inaccessible data
- No real-time visibility of tasks performed & forms filled

Say hello to a simplified process of creating **DIGITAL CHECKLISTS** :

Rest assured, no need for time-consuming backend development of checklists. With eChecklist, even a non-SME can create any number of forms quickly using the templates.

Delivering a rich spectrum of **BENEFITS** :

1. Improved adherence to SOP
2. 100% electronic, safe and reliable
3. Promotes integrity through time stamps, operator name, roles, electronic signature
4. No data tempering/manipulation
5. Sustainable solution by addressing Environment, Safety, Social & Governance guidelines & issue.
6. 21 CFR( Part 11) & GAMP Compliance
7. Analytical Dashboard & quick search by keywords to search records, report details
8. Promotes sustainability by eliminating paper usage, maintenance cost and space

We Make Enterprise Smarter through **INDUSTRY 4.0**

We provide smart solutions for Business Transformation in the area of manufacturing, supply chain, sales & Infrastructure services. Our solutions offer Digital Enterprise, Industrial IoT, Data Science & Analytics to clients worldwide.
