

**ManageX** is a cloud offering that represents years of understanding what works - and what doesn't - to better enable academic research computing workflows, applications, and services.

### Self-Service Research

Staff using web portals

### Reproducible Research

IT Department using templates

### Research-as-a-Service

Researchers in workspaces

## ManageX Academy

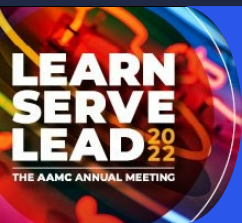

Tailored courses that empower researchers and higher ed students with working knowledge of data science, genomics, and high-performance computing.

## ManageX

## Workspaces

Fully secure, compliant, and 'always-on' virtual project environments that facilitate greater research collaboration integrating multiple data sets wherever they may be.
