Address a Broad Range of Transformational Needs

Enterprise Architecture

Move Enterprise Architecture beyond IT planning and rationalization to drive digital transformation.

Strategic Portfolio Management

Provide actionable insights across your enterprise portfolios to drive strategy execution.

Business Capability Management

Manage the maturity of business capabilities to realize your strategic goals.

Application Portfolio Management

Modernize the application portfolio to enable your future business strategy.

Business Process Analysis

Optimize business performance with cross-functional process analysis and design.

Business and IT Roadmapping

Timeline the technology changes needed to enable your business transformation.

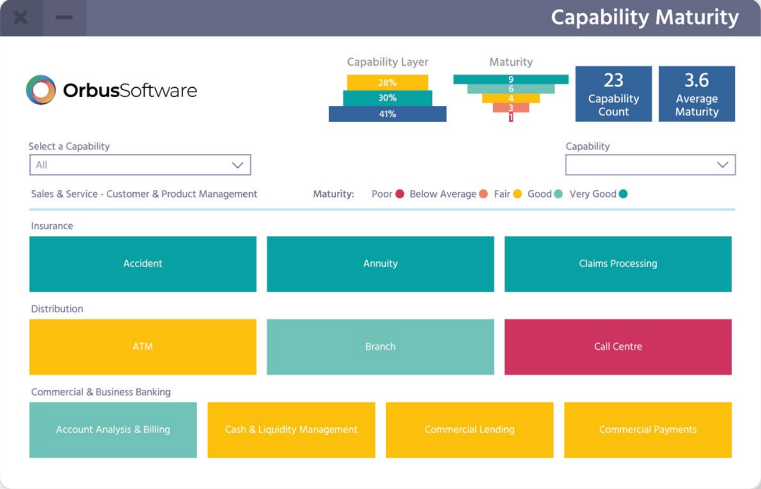

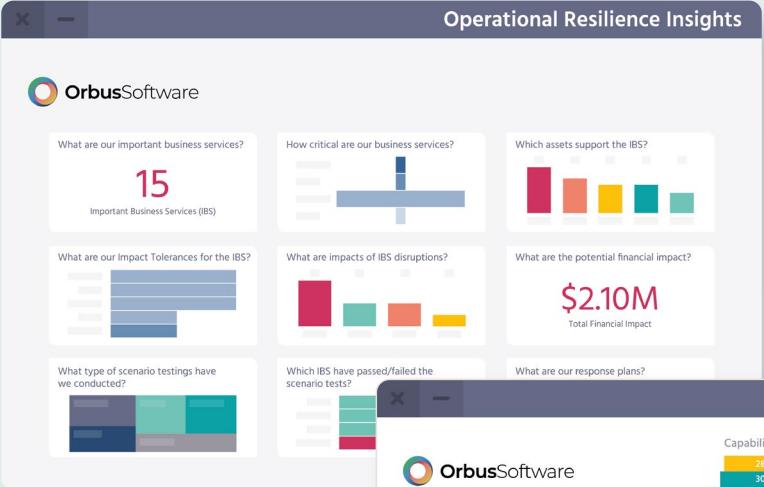

Cybersecurity and Risk Management

Identify and manage risks and cyber threats to your business and IT landscape.

Governance, Risk & Compliance

Manage IT governance and risk while ensuring business and regulatory compliance.

Core Capabilities

Modeling

Best-in-class Visio Integration provides a powerful modeling environment, featuring unique flexible mapping options and ready-made Viewpoint templates.

Decision Analysis

A range of built-in repository views and graphical visualizations offer unparalleled support for architects to analyze and maintain the repository.

Metamodel & Frameworks

Out-of-the-box EA framework support, supporting any standard or notation and an easily customizable metamodel.

Presentation

Guide and inform stakeholders with an enhanced document viewer and a fully customizable SharePoint site, with easily shareable pages.

Integration & Interoperability

Integration solutions with a variety of 3rd party systems are available out-of-the-box, with a comprehensive REST API enabling further integrations.

Collaboration

OrbusInfinity's SharePoint site enables data gathering from all parts of the business, while the Solutions Hub provides readymade surveys and integration with Teams.

Repository

A web-based, central repository manages all your enterprise content, providing a single source of truth for collaboration and strategic decision-making.

Security

Azure Active Directory provides detailed user management features, including the creation of assignable roles to give access to specific features.

Reporting

A set of Power BI dashboards and visualizations that can be easily published to the OrbusInfinity SharePoint site for rapid stakeholder involvement.

SharePoint DMS

A unique SharePoint document repository removes barriers to adoption by providing familiar Office interfaces, enabling the leverage of existing document collaboration.

Unify Enterprise Data

Leverage data from your existing technology ecosystem and engage the business in tools they use every day.
