

Crux Overview

Jeff Wecker
CTO, Two Sigma

“We’ve been using Crux for almost two years now and are happy with the company’s ability to meet our high standards.

We consume a large number of datasets from a wide range of sources through Crux, which simplifies our ingestion and operational burden dramatically, [allowing us to focus our team on higher-value and more differentiated activities.](#)

We are impressed by Crux’s customer focus, service level and data inventory, as well as acceleration we see in dataset onboarding.”
